In March 2019, NASBA will transition all CPA user accounts, including course and attendance records, from the *CPEtracking* tool to the new platform, *CPE Audit Service*.

Beginning on March 4, 2019, users will no longer have access to *CPEtracking* as their historical data is migrated to the *CPE Audit Service*. Once the transition is complete, Board of Accountancy staff will receive training on the new system and determine when the new platform will be launched for use by its CPA licensees.

CPA users will receive an email at the current email address on file with their State Board of Accountancy that will contain the information needed to register their new account in the *CPE Audit Service* platform. All pertinent access information will be included in the registration communication. Once launched, the new *CPE Audit Service* platform will also include video tutorials that focus on the new features and most commonly used components.
