INTRODUCTION

The National Association of State Boards of Accountancy (NASBA) began gathering data on CPA examination candidates in 1982 and has published reports on performance and selected characteristics since 1985. This edition of the book covers candidate performance for the Uniform CPA Examination (Examination) for the calendar year 2006. NASBA offers these reports through the voluntary participation of candidates and their individual boards of accountancy, which provide data, and the cooperation of the American Institute of Certified Public Accountants (AICPA), which prepares and scores the Examination for the 55 U.S. jurisdictions.

BACKGROUND DATA

The background data is obtained directly from state boards of accountancy, when they submit information about eligible candidates to NASBA's Gateway System. The Gateway System is a Web Interface which provides state boards a means to enter, review, and manage candidate information. The process of entering candidate information using the Web Interface results in the eventual scheduling of an Examination by the candidate. Candidate information is transmitted through the Gateway System and stored in the National Candidate Database (NCD) where all CPA candidate information and Examination history data are maintained.

SPECIAL NOTE ABOUT THIS EDITION

This year's edition has been completely redesigned to better meet the needs of the both NASBA's stakeholders and the book's numerous end users. In addition to the summary data points, significant emphasis was placed on developing and presenting a comprehensive and graphical view of candidate performance from a variety of different viewpoints. One of the most noticeable changes is the inclusion of a 2-page dashboard for each of the jurisdictions represented in this book.

Additional improvements include:

- Enhanced demographic reporting: Age, Gender, Home Country
- International exam performance metrics
- School rankings based on program size
- Inclusion of more schools in the publication

DEMOGRAPHICS

The reader should note that demographic data is not reported completely for all jurisdictions. This gap in data is often due to the fact that the reported information may not be critical to a given jurisdiction's application process and thus not collected. NASBA will continue to work with several of the jurisdictions to close many of the data collection gaps.

FIRST-TIME VERSUS REPEAT CANDIDATES

A candidate's initial attempt at a section is labeled as a First-Time (FT) event; all subsequent attempts to retake that particular section are labeled as Re-Exam (RE) events. It is entirely possible for a given candidate to have both FT and RE events for multiple sections of the test or to have exclusively FT events for some sections and exclusively RE events for others. Candidates often require multiple attempts (events) before passing a particular section.

A candidate's status as FT or RE is evaluated on a section-by-section basis. Candidates are considered to be FT candidates the first time they take a given section. If a candidate fails that section, then the candidate is treated as a RE candidate for all subsequent administrations of that section. By definition, candidates can have only one FT event per section but can have multiple RE events for each section. Event-level passing rates are calculated as the number of passing events (either FT, RE or combined) divided by the total number of events (either FT, RE or combined).

FEEDBACK

The changes and improvements in this book are a direct result of the feedback received from the many end users of this product. Although this edition has made significant strides over previous editions, we acknowledge that there is additional room for improvement. To get there, we need your feedback, both positive and negative. Please send any questions, comments and (most importantly) suggestions to CPB@nasba.org.

GENERAL DISCLAIMERS / LIMITED LIABILITY:

Notwithstanding any language to the contrary, nothing contained herein constitutes nor is intended to constitute a promise of any kind. While reasonable efforts are made to insure accurate and up to date information in this *Candidate Performance Book*, the data contained herein is for informational purposes only and is not represented to be error free. 2006 JURISDICTION PERFORMANCE

DASHBOARDS

This section contains a dashboard view of candidate performance for each jurisdiction. The format and content are similar to the quarterly dashboards that are published at the end of each testing window. Each jurisdiction independently provides data to NASBA, which may, at times, result in incomplete information.

Glossary

Data Definitions

Below are brief descriptions for the data fields and terms found in this publication. With the exception of the multi-year trends, the data presented in this publication represents the statistics and performance for only those candidates and testing events during all four testing windows of 2006.

Advanced Degree: The number or percentage of sections associated with an application listing an advanced degree (graduate or post graduate) as the primary degree. Because the degree is associated with an application and not the candidate, a single candidate can be reported under multiple degree types during his/her examination process. Data associated with jurisdictions allowing a certificate of enrollment (COE) are most affected by this reporting methodology.

Age: All ages used for calculations at the time of a given testing event for each candidate. If a candidate sits for multiple sections in a given year, his/her age is calculated four separate times.

Age Rank: Ranking of jurisdictions based on the average age of its candidates. The youngest average age jurisdiction was arbitrarily given the ranking of 1. A higher or lower ranking is provided as a relative reference only and not intended to denote a level of performance.

Average: All averages (mean) are calculated at the testing event level.

Candidate: A unique (distinct) individual participating in the examination process during the reported testing window and, if applicable, within the reported category. For example, a candidate who sat for a two sections in each of the 4 quarters would count as 1 candidate in the respective quarter and as 1 candidate for the year.

Degree Type: Candidate degrees are recorded at the time of application and are associated with the testing event. The degree for that event will remain the same even if the candidate earns a different degree prior to passing all 4 sections.

First-Time: First-Time (FT) refers to sections that were taken for the first time by a given unique candidate.

Foreign: The number or percentage of candidates with an international address who applied to sit for the exam. These candidates can include U.S. citizens who are living or studying abroad at the time of application.

Gender: A candidate's gender is determined by salutation entered during the application process (Mister, Misses, etc...). This field is not captured by all jurisdictions.

In-State Address: The number or percentage of candidates who applied to sit for the exam in the same jurisdiction in which they reside.

Institution: A place of higher learning, typically a college or university, is referred to as an institution.

Jurisdiction: The 50 States plus the District of Columbia, Puerto Rico, Northern Mariana Islands, U.S. Virgin Islands and Guam.

New Candidate: A candidate who has not sat for ANY testing event prior to the testing window in which they are being reported.

Out-of-State Address: Refers to a candidate with a mailing address in one of the 55 jurisdictions but is applying to sit for the exam in a different jurisdiction.

Pass Rate or Percent Pass: The pass rate is calculated directly by dividing the count of testing events passed by the total testing events.

Passing 4th Section: A candidate who successfully passes his/her final section of the exam during the reported period is counted in this metric.

Re-Exam: Re-Exam (RE) refers to all testing events subsequent to the First-Time testing event.

Score: The numerical score received for each testing event.

Section: Refers to one of the four areas of the Examination: AUD, BEC, FAR or REG. The term Section(s) is also synonymous with Testing Event(s) for this and other NASBA reports.
