## INTRODUCTION

The National Association of State Boards of Accountancy (NASBA) has gathered data on CPA examination candidates since 1982 and began publishing selected compilations compared against examination outcomes in 1985. This book reports on the Uniform CPA Examinations given in May and November 1993.

NASBA is able to offer this report through the voluntary participation of individual boards of accountancy and the cooperation of the American Institute of Certified Public Accountants (AICPA), which prepares and grades the Uniform CPA Examination for the 54 boards of accountancy which use it. To participate in the study, a board of accountancy distributes to each examination candidate a questionnaire requesting biographic and demographic information. Completed questionnaires are sent by the boards to NASBA at the conclusion of both the May and November examinations. Candidate information is entered into a computer system and matched against examination grades. The identity and grades of individual candidates have been revealed only to the certifying jurisdiction.

Tabular reports for the examinations given in 1993 are presented following this commentary. The 12 reports for each examination are consistent in topic, format, and preparation with those presented in previous years. Educational institutions from which fewer than five candidates took the examination are not listed separately in the school reports (12A-D) but are included in the School Index following the reports for each examination.

In all of the tabular reports, as well as in the commentary, performance is defined in terms of a passing score of 75 or above. All four subjects (Auditing, Business Law, Accounting Theory, and Accounting Practice) must be passed for a candidate to successfully complete the examination. It should be recognized, however, that achieving a score of 75 or above does not assure the candidate of

earning credit for a particular examination subject. This is because of conditioning requirements, which vary among jurisdictions and make the granting of credit dependent on passing one or more subjects or achieving a minimum score on the subjects failed. Conditioning requirements and credits earned have not been considered in preparing this report.

The tabular reports show the percentages of candidates earning passing scores on each subject, as well as on all subjects taken at the specific examination, on none of the subjects taken, and on at least one, but not all, of the subjects taken. Again there are variations among jurisdictions. Some jurisdictions require first-time candidates to take all four subjects and repeat candidates to take all remaining subjects. Other jurisdictional requirements are not as strict; candidates may take less than all of the subjects for which they are eligible and receive grades only in the subjects completed. In most situations, however, candidates generally complete all remaining subjects.

As a general rule, one must exercise caution in drawing conclusions from data of this nature. While examination scores are taken directly from AICPA records and thus are accurate, candidate characteristics are accepted as reported by the candidates themselves. No attempt is made to verify these candidate representations, nor to edit the candidate data for reasonableness. Undoubtedly, there are situations where candidates intentionally or unintentionally omit or misrepresent data. As noted where appropriate, such misstatement will vary based upon the characteristics involved. As in prior years, this commentary has been prepared by Park E. Leathers, Ph.D., CPA, the Ernst & Young Professor of Accounting at Bowling Green State University. The comments are those of Professor Leathers and do not represent an official interpretation of the data by NASBA.

## AN OVERALL VIEW OF PERFORMANCE

The percentages of candidates with passing scores on individual subjects are summarized below. These data come from Reports 1 and 2.

### PASSING PERCENTAGES BY SUBJECT

|                        | <u>May</u><br><u>1993</u> | <u>November</u><br><u>1993</u> |
|------------------------|---------------------------|--------------------------------|
| First-time candidates: |                           |                                |
| Auditing               | 30.5%                     | 29.6%                          |
| Business Law           | 31.0                      | 30.3                           |
| Accounting Theory      | 35.2                      | 32.7                           |
| Accounting Practice    | 34.6                      | 33.0                           |
| Repeat candidates:     |                           |                                |
| Auditing               | 34.8%                     | 33.9%                          |
| Business Law           | 34.8                      | 34.1                           |
| Accounting Theory      | 31.8                      | 31.2                           |
| Accounting Practice    | 31.7                      | 29.6                           |

In general, first-time candidates perform better in Accounting Theory and Accounting Practice, and repeat candidates are stronger in Auditing and Business Law. This has been observed for previous examinations and is believed to occur because the Accounting Theory and Accounting Practice examinations are oriented to the materials taught in the college curriculum. Repeat candidates in Auditing benefit from work experience. In addition, those repeat candidates who initially passed Theory and

Practice have the opportunity to concentrate on Auditing and Business Law, the subjects they are most likely to have failed initially.

Two statistics from Reports 1 and 2 summarize overall performance. The first of these is the percentage of candidates passing all subjects they took. The second is the percentage passing at least one subject. (The latter statistic may be computed by adding the "all" and "some" columns or by subtracting the "none" column from 100 percent.) These data are summarized below:

### OVERALL PASSING PERCENTAGES

|                        | <u>May</u><br><u>1993</u> | <u>November</u><br><u>1993</u> |
|------------------------|---------------------------|--------------------------------|
| First-time candidates: |                           |                                |
| All subjects           | 19.4%                     | 17.8%                          |
| At least one subject   | 48.7                      | 47.1                           |
| Repeat candidates:     |                           |                                |
| All subjects           | 30.4%                     | 28.3%                          |
| At least one subject   | 56.0                      | 55.0                           |

Overall passing percentages for repeat candidates are substantially higher than those for first-time candidates. This is not surprising because repeat candidates generally undertake fewer subjects.

There were 65,966 first-time and repeat candidates in May 1993 and 74,266 candidates in November 1993. These figures represent increases from 1992, but the annual total was slightly below that of the late 1980's. By and large, the total annual number of candidates has hovered around 140,000 since 1982.

Two other NASBA reports address overall performance. Report 9 summarizes performance based upon the number of times candidates took the examination and the total number of subjects taken; and Report 10 presents performance by subject based on the number of times each subject was taken. The following comments are based upon these two reports for 1993.

- The number of candidates taking a particular examination subject decreases with the number of times the examination has been taken, i.e., more candidates take the examination for the first time than for the second time, and so forth.
- The percentage of candidates passing all subjects increases as fewer subjects are taken. (An exception is noted for first-time candidates, where there is little difference in passing rates between those taking four subjects and those taking three.)
- The percentage of candidates passing all subjects taken increases at least through the third examination. This is attributable to the fact that fewer subjects usually are undertaken on subsequent sittings.
- After candidates have taken the examination more than six times, the passing rate declines, irrespective of the number of subjects undertaken.
- More candidates take all four subjects than three subjects, regardless of the number of times they have taken the examination; this is because of conditioning requirements.
- First-time passing percentages in Accounting Theory and Accounting Practice are higher in May than in November. There is no strong pattern related to first-time performance in Auditing and Business Law or to the success rates for repeat candidates.

## PARTICIPATION AND PERFORMANCE BY JURISDICTION

After each examination, NASBA recognizes as "honor roll states" those jurisdictions whose candidates have achieved passing grades in all subjects at a rate that is higher than the national average. The honor roll states for 1993 are presented below.

### HONOR ROLL STATES

#### May 1993

Arizona  
California  
Colorado  
Florida  
Georgia  
Idaho  
Illinois  
Minnesota  
Oregon  
Utah  
Washington  
Wisconsin  
Wyoming

#### November 1993

Arizona  
California  
Colorado  
Florida  
Illinois  
Iowa  
Louisiana  
Minnesota  
Nebraska  
New York  
Oregon  
Utah  
Washington  
Wisconsin

Not surprisingly, many of the above states appear among the top performers in the tables presented below. However, the tables include first-time candidates only, whereas the honor roll incorporates performance for all candidates. Moreover, a jurisdiction's candidates may perform very well on a particular subject but below average on one or more other subjects, thus not achieving the honor roll designation for that state. In the first table below, the ten highest ranking jurisdictions are listed by overall success of

first-time candidates passing all subjects. The other four tables show the five jurisdictions with the highest rankings by examination subject. These data are presented only as a matter of interest, and conclusions regarding quality should be avoided. Many factors, in addition to candidate ability and preparation, affect the performance of a jurisdiction's candidates. These include variations in eligibility to take the examination, the number of subjects for which the candidate may register, and conditioning requirements.

**SUCCESS RANKING BY JURISDICTION**  
**First-time Candidates Passing All Subjects Taken**

| <u>Rank</u>     | <u>Jurisdiction</u> | <u>Percentage<br/>Passing</u> | <u>Rank</u>          | <u>Jurisdiction</u> | <u>Percentage<br/>Passing</u> |
|-----------------|---------------------|-------------------------------|----------------------|---------------------|-------------------------------|
| <u>MAY 1993</u> |                     |                               | <u>NOVEMBER 1993</u> |                     |                               |
| 1               | Idaho               | 35.0                          | 1                    | Florida             | 31.3                          |
| 2               | Florida             | 31.7                          | 2                    | Minnesota           | 30.6                          |
| 3               | Oregon              | 30.9                          | 3                    | Wisconsin           | 28.9                          |
| 4               | Minnesota           | 29.3                          | 4                    | Arizona             | 27.5                          |
| 5               | California          | 28.8                          | 5                    | Oregon              | 25.1                          |

### COLLEGE AND UNIVERSITY DATA

Graduates from more than 1000 colleges and universities are represented among the candidates for the CPA examination. (See the School Index, Report 14, for a complete list.) NASBA summarizes examination performance (by

subject and overall) for each school with five or more candidates in a particular category. These data are presented in the following statistical reports.

| <u>Report</u> | <u>Title</u>                                             |
|---------------|----------------------------------------------------------|
| 12A           | First-time candidates without advanced degrees by school |
| 12B           | First-time candidates with advanced degrees by school    |
| 12C           | Repeat candidates without advanced degrees by school     |
| 12D           | Repeat candidates with advanced degrees by school        |

The desirability of reporting these data is somewhat controversial. NASBA does not claim that these data (or the rankings below) are indices to overall educational quality. Nor does it believe that an institution's primary purpose is to prepare candidates for the CPA examination or that schools should necessarily concentrate on improving their relative standings. Moreover,

many of the factors affecting examination performance are beyond the control of the accounting faculty. These include the general scholastic ability of the institution's students, the number and relative ability of the students from that institution who take the examination, the time lapse from graduation before candidates choose to take the examination, other formal and

informal preparation undertaken by candidates, the university's general educational requirements, and the jurisdiction's requirements for examination eligibility and conditioning.

On the other hand, there is wide interest in these data. Schools are understandably curious about how their students performed and how they compare to their peers. In the absence of this survey, the information likely will be surmised and

reported in an ad hoc, less comprehensive manner. There also will be pressure on state boards of accountancy to produce these data, as many previously did. The purpose of NASBA reporting these data is to provide information. The importance to be attached to this information, and the use to be made of it, if any, is left to the individual reader.

## INSTITUTIONAL REPRESENTATION

Although many colleges contributed only a few candidates, there were 254 institutions with 20 or more first-time candidates without advanced degrees in May and 290 institutions with at least 20 such candidates in November. Additionally, the number of colleges represented by first-time candidates with advanced degrees is increasing.

In May 1993, there were 47 institutions with ten or more advanced-degree candidates, and in November 1993 there were 63. By combining the totals for both examinations, a 67 percent increase from 1990 is noted. Listed below are the colleges and universities with the most candidates from each category.

### INSTITUTIONAL PASSING RATES

The schools with the highest passing percentages for first-time candidates on individual examination subjects are listed below for the May 1993 and November 1993 examinations. The eli-

gibility criterion for an institution's inclusion on the list is at least 20 graduates with baccalaureate degrees or ten candidates with advanced degrees.

### RANKING OF COLLEGES AND UNIVERSITIES BY PERCENTAGE PASSING INDIVIDUAL EXAMINATION SUBJECTS

The following table lists the schools whose first-time candidates without advanced degrees had the ten highest passing rates, defined as passing all subjects the candidate took. It also includes schools that had the five highest passing rates

among candidates with advanced degrees. To be eligible for the listings, an institution must have had at least 20 graduates with baccalaureate degrees among its first-time candidates or ten first-time candidates with advanced degrees.

The 70 percent passing percentage earned by Idaho State University in May 1993 is the second highest achieved by an undergraduate institution in the 1985-1993 period. It has been surpassed only by Washington University (70.4 percent) in May 1992. Given the many schools eligible for

the above lists, it is noteworthy that several schools have achieved superior passing percentages on numerous occasions during the nine years (18 examinations) that these data have been compiled. Those listed five or more times are recognized in the following table.

COLLEGES AND UNIVERSITIES WITH THE HIGHEST PERCENTAGE  
OF CANDIDATES PASSING ALL SUBJECTS TAKEN  
1985-1993

**Candidates Without Advanced Degrees**

| <u>School</u>                          | <u>Listings</u> |
|----------------------------------------|-----------------|
| University of Pennsylvania             | 14              |

| University of Denver                    | 5               |
| State University of New York at Buffalo | 5               |

## CHARACTERISTICS OF CANDIDATES

The primary objective of this study is to gather information on the characteristics of CPA examination candidates, relate these characteristics to examination performance, and identify

changes and trends in the pattern of characteristics. Candidate characteristics are presented in seven reports, as follows.

| <u>Report</u> | <u>Title</u>                                                         |
|---------------|----------------------------------------------------------------------|
| 3             | Performance of candidates by highest level of education achieved     |
| 4             | Performance of first-time candidates by major                        |
| 5             | Performance of first-time candidates by overall grade point average  |
| 6             | Performance of first-time candidates by semester hours of accounting |
| 7             | Performance of candidates by accounting experience                   |
| 8             | Performance of first-time candidates by SAT and ACT scores           |
| 11            | Performance of candidates by supplementary study                     |

Traditionally four of these characteristics have been strongly associated with candidate achievement. They are (1) level of education, (2) overall grade point average, (3) SAT and ACT scores, and (4) supplementary-study (CPA coaching). The other three characteristics (college major, semester hours of accounting, and accounting work experience) have relatively little effect on performance.

In general, the traditional relationships were affirmed in 1993. This is illustrated in the table at the end of this section, which presents May 1993 and November 1993 outcomes and compares them to May 1991 and May 1992. In this table, "success ratios" have been computed by dividing the percentage of successful first-time candidates possessing a particular characteristic by the passing percentage for all first-time candidates at that examination. "Successful" is defined as passing all subjects taken. A score of 100 denotes exact consistency with the overall passing percentage for first-time candidates for that examination. A score of 200 indicates that a person possessing this attribute is twice as likely to pass all subjects as the average candidate; a score of 50 shows half the average likelihood of passing.

It should also be noted that this table represents a two-way relationship only; therefore, a direct link is not necessarily implied. For example, both higher level education and higher

SAT scores are associated with examination performance. Theoretically, therefore, the above-average relationship between graduate education and examination performance might be attributable to the fact that persons going to graduate school have higher SAT scores, or a third factor might cause both effects. Multivariate analysis alleviates this problem by incorporating several influences in one model and, in effect, neutralizing the correlation between these explanatory variables. Although a multivariate analysis was not undertaken for this study, its use on previous occasions has affirmed the causative influence of education level, grade point average, SAT and ACT scores, and CPA coaching on examination performance, with little or no influence ascribed to the other three characteristics summarized.

Brief comments on each of these characteristics follow.

### LEVEL OF EDUCATION

The percentage of first-time candidates with advanced degrees continued to rise slightly, reaching 10.9 percent in May 1993 and 11.8 percent in November 1993. This compares to a range of 9.5 percent to 11 percent in the latter 1980's but still is below the experience in the 1975-1980 period, when rates of 13 percent to 15 percent were observed.

Completion of an advanced degree is associated with enhanced CPA examination perfor-

unce. First-time candidates who hold advanced degrees are 75 percent more likely to pass all objects taken than candidates who hold only bachelor's degrees.

#### **ACADEMIC MAJOR**

Eighty-eight percent of the 1993 first-time candidates without advanced degrees cited accounting as their undergraduate majors. This is a decrease of less than 60 percent of the advanced-degree holders. Among candidates with bachelor's degrees only, non-accounting majors consistently have outperformed those with accounting degrees. Two factors may account for this. First, the non-accounting majors are likely to have above average academic credentials; it is likely that they will be attracted to a new area of study or be accepted in it if they do not. Second, because of their lack of academic background in accounting, the non-accountants may be motivated to prepare better for the examination. At the advanced degree level, major has little impact; however, accounting majors in 1993 continued a slight performance advantage over non-accounting majors.

#### **GRADE POINT AVERAGE**

Academic achievement, determined by overall grade point average (GPA), is strongly associated with superior performance. On average, first-time 1993 candidates with GPAs of 3.0 or better were twice as likely to pass all objects as those in the 3.0 to 3.49 range and four times as likely to pass as those with GPAs below 3.0.

The average graduate GPA was 3.47 for 1993, and the average undergraduate GPA was 3.0. This is one of the most consistent statistics in the study, which has changed little since 1985.

#### **SEMESTER HOURS OF ACCOUNTING**

The average first-time candidate with an advanced degree reported 32 semester hours of accounting and those with bachelor's degrees only reported about 26 semester hours. In each case, the number of semester hours increased approximately one hour from 1991-1992 to 1993. Somewhat greater examination success was experienced by candidates who reported up to 35

hours. Beyond that point, performance deteriorated.

#### **WORK EXPERIENCE IN ACCOUNTING**

There has been a long-term trend to take the CPA examination earlier in one's career, thus providing less time for work experience prior to the first attempt. In 1993, 12 percent of first-time candidates in May, and 18 percent in November, indicated one or more years of work experience in public accounting. Comparatively, in 1991-1992, 14 percent of the May candidates and 20 percent of the November candidates reported the same amount of work experience. Regardless of examination date, about 25 percent of first-time candidates had one year's experience in private accounting, five percent had one year's experience in governmental accounting, and one percent had taught accounting full-time for a year or more. These percentages may understate actual experience somewhat because candidates who do not respond to this item in the questionnaire are recorded as having no experience.

One cannot deduce precisely from Report 7 the number of candidates with one or more years of total accounting experience. A candidate's experience may be reported in more than one category. Similarly, years of accounting experience, particularly in industry, are not necessarily an indication of years out of school because candidates may have obtained experience prior to or while attending school. Moreover, candidates from industry can be expected to defer taking the examination for the first time because the CPA certificate usually is not critical to their careers. These factors contribute to the higher level of experience in industry than in public accounting reported by first-time candidates.

Work experience is not highly correlated with examination success. Only those with full-time teaching experience consistently achieve above-average passing percentages. The ranking of performance for the other three types of experience are: (1) public accounting; (2) private accounting; and (3) governmental accounting. As much as anything, this ranking likely reflects the time elapsed between graduation and the first attempt at the examination.

## SAT AND ACT SCORES

The profession has had cause for concern from a long-term decline in the SAT and ACT scores of CPA examination candidates. Fortunately, this characteristic has stabilized in recent years, as demonstrated in the following

table, which compares average scores in 1993 with 1988, the last year in which general declines were noted. The "average" scores shown in this table are estimates based on the distribution of scores provided by candidates.

### ESTIMATED AVERAGE SAT AND ACT SCORES FOR FIRST-TIME CANDIDATES

|                 | <u>May</u><br><u>1988</u> | <u>November</u><br><u>1988</u> | <u>May</u><br><u>1993</u> | <u>November</u><br><u>1993</u> |
|-----------------|---------------------------|--------------------------------|---------------------------|--------------------------------|
| SAT Verbal      | 516                       | 515                            | 515                       | 515                            |
| SAT Mathematics | 576                       | 572                            | 581                       | 581                            |
| ACT English     | 23.6                      | 23.5                           | 24.0                      | 24.0                           |
| ACT Mathematics | 25.1                      | 24.9                           | 25.5                      | 25.4                           |

The recovery in scores is modest (at most one percent to two percent) and the candidates' scores remain substantially below those observed in the 1975-1980 period.

Even the stabilization and limited recovery in SAT and ACT scores is important. Like educational level and grade point average, SAT and ACT scores historically have been strongly

associated with CPA examination performance. This relationship prevailed again in 1993. The following table shows the ratio of passing percentages for the top two categories of candidates (600 and above for the SAT and 28 and above for the ACT) to the lower two categories (below 500 for the SAT and below 24 for the ACT).

### RATIOS OF FIRST-TIME PASSING RATES FOR HIGH AND LOW SAT AND ACT SCORES

|                 | <u>May</u><br><u>1993</u> | <u>November</u><br><u>1993</u> |
|-----------------|---------------------------|--------------------------------|
| SAT Verbal      | 2.2                       | 2.2                            |
| SAT Mathematics | 2.8                       | 3.2                            |
| ACT English     | 2.3                       | 2.1                            |
| ACT Mathematics | 2.6                       | 2.8                            |

The higher group is at least twice as likely to pass all subjects. The association with mathematical skills is particularly strong.

It is probable that the SAT and ACT scores reported by candidates are biased upward (not only in 1993 but also in prior years). These scores are difficult to remember, and a few candidates may feel it to their advantage to intentionally overstate performance. This measurement bias, if

it occurs, tends to diminish the observed relationship between examination performance and the SAT or ACT score. This is believed to result in the anomalous results for the SAT verbal score, where the small group of candidates with scores of 700 or above are regularly outperformed by the group with scores of 600 to 699. There was a similar anomalous outcome in May 1993 for those scoring 32 or above on the ACT English examination.

## PPLEMENTARY STUDY

Approximately half of the examination candidates report participation in a supplementary review course. Once again, of course, this is self-reported attribute, and therefore subject to bias. According to the instructions, the course could only be reported if it has been taken in the months immediately prior to the examination and only if it is not taken for academic credit. It is probable that some candidates misunderstand these instructions. It also is likely that many of the candidates not responding have had some sort of course, even if it only involved home-study.

By far the most popular approach to supplementary study is the privately-offered, proprietary "cram course." More than a third of first-time candidates reported participation. These courses also are the most helpful to candidates. First-time candidates with proprietary

courses were 50 percent more likely to pass all subjects than the candidates who did not participate in a course, and 40 percent more likely to pass all subjects than the first-time candidate who prepared by home study. The relative strength of proprietary courses is consistent with observations in prior years.

Results for coaching alternatives to the proprietary course have been mixed. College-sponsored courses tend to be the second most effective, particularly in the spring, followed by firm-sponsored courses. Participants in both college-sponsored and firm-sponsored courses generally outperform candidates with no course indicated, but this often is not the case for home study. Perhaps the most noteworthy observation in this area for 1993 was the relatively minor advantage of coaching courses for the repeat candidates who only had one or two subjects remaining.

## RELATIONSHIP OF FIRST-TIME CANDIDATE CHARACTERISTICS TO CPA EXAMINATION PERFORMANCE

| Characteristic               | May<br>1991 | Success Ratio (100=Average) |             |                  |
|------------------------------|-------------|-----------------------------|-------------|------------------|
|                              |             | May<br>1992                 | May<br>1993 | November<br>1993 |
| Education level              |             |                             |             |                  |
| Advanced degree              | 162         | 152                         | 161         | 167              |
| Bachelor's degree            | 89          | 94                          | 94          | 94               |
| Less than bachelor's         | 112         | 84                          | 75          | 46               |
| Graduate major               |             |                             |             |                  |
| Accounting                   | 169         | 156                         | 166         | 171              |
| Other                        | 164         | 148                         | 165         | 160              |
| Undergraduate major          |             |                             |             |                  |
| Accounting                   | 88          | 92                          | 91          | 91               |
| Other                        | 110         | 115                         | 130         | 127              |
| Graduate grade point average |             |                             |             |                  |
| 3.50 to 4.00                 | 218         | 197                         | 236         | 234              |
| 3.00 to 3.49                 | 125         | 118                         | 99          | 98               |
| Less than 3.00               | 52          | 75                          | 55          | 73               |

| <u>Characteristic</u>                 | <u>Success Ratio (100=Average)</u> |                           |                           |                                |
|---------------------------------------|------------------------------------|---------------------------|---------------------------|--------------------------------|
|                                       | <u>May</u><br><u>1991</u>          | <u>May</u><br><u>1992</u> | <u>May</u><br><u>1993</u> | <u>November</u><br><u>1993</u> |
| Undergraduate grade point average     |                                    |                           |                           |                                |
| 3.50 to 4.00                          | 171                                | 167                       | 177                       | 180                            |
| 3.00 to 3.49                          | 80                                 | 86                        | 79                        | 81                             |
| 2.50 to 2.99                          | 38                                 | 46                        | 41                        | 40                             |
| Less than 2.50                        | 21                                 | 33                        | 34                        | 22                             |
| Semester hours of accounting—         |                                    |                           |                           |                                |
| Candidates with advanced degrees      |                                    |                           |                           |                                |
| More than 41                          | 143                                | 141                       | 133                       | 152                            |
| 36 to 40                              | 173                                | 164                       | 158                       | 163                            |
| 31 to 35                              | 158                                | 158                       | 168                       | 182                            |

### SUMMARY

The 1993 NASBA study of CPA examination candidate characteristics and performance continues a tradition begun in the 1980s. In general, the results affirm those reported in prior years. The jurisdictions associated with above-average examination success, and the academic institutions with outstanding results, also show considerable consist-

ency. Once again the characteristics primarily associated with superior performance were educational level, grade point average, SAT scores, ACT scores, and participation in a CPA coaching course. College major, semester hours of accounting, and accounting work experience had little impact.

**May 1993  
Tabular Reports**

- 1      **Performance of First-time Candidates by State**
  - 2      **Performance of Repeat Candidates by State**
  - 3      **Performance of Candidates by Highest Level of Education Achieved**
  - 4      **Performance of First-time Candidates by Major**
  - 5      **Performance of First-time Candidates by Overall Grade Point Average**
  - 6      **Performance of First-time Candidates by Semester Hours of Accounting**
  - 7      **Performance of Candidates by Accounting Experience**
