INTRODUCTION

The National Association of State Boards of Accountancy (NASBA) began gathering data on CPA examination candidates in 1982 and has published reports on performance and selected characteristics since 1985. The reports in this book are for the Uniform CPA Examinations given in May and November 2003.

NASBA offers these reports through the voluntary participation of individual boards of accountancy and the cooperation of the American Institute of Certified Public Accountants (AICPA), which prepares and grades the Uniform CPA Examination for the 54 U.S. jurisdictions. To participate in the study, a board of accountancy distributes a questionnaire to each examination candidate requesting biographic and demographic information. Completed questionnaires are sent by the boards to NASBA after each May and November examination. Candidate information is entered into a computer system and matched against examination grades to generate statistical reports of performance. The identities and grades of individual candidates are kept confidential.

The tabular reports for the examinations given in 2003 are presented following this commentary. The 13 reports for each examination are consistent in topic and format with those presented from 1994 to 2002. In all of the tabular reports, as well as in this commentary, performance is defined in terms of a passing score of 75 or above. All four subjects (Auditing [AUDIT], Business Law and Professional Responsibilities [LPR], Financial Accounting and Reporting—Business Enterprises [FARE], and Accounting and Reporting—Other Areas [ARE]), must be passed for a candidate to successfully complete the examination. It should be recognized, however, that achieving a score of 75 or above does not assure the candidate of earning credit for a particular examination subject. This is because of conditional requirements, which vary among jurisdictions and make the granting of credit dependent on passing two or more subjects and/or achieving a minimum score on the subjects failed. Conditioning requirements and credit earned have not been considered in preparing the tabular reports or this summary.

The tabular reports show the percentages of candidates earning passing scores on each individual subject, passing all of the subjects taken, passing none of the subjects taken, and passing at least one, but not all, of the subjects taken. Again there are variations among jurisdictions. Most jurisdictions require that first-time candidates take all four subjects and that repeat candidates take all remaining unpassed subjects. However, some jurisdictions are not as strict; in these jurisdictions, candidates may take fewer than all of the subjects for which they are eligible and receive grades only in the subjects completed. This affects passing rates to an extent, as addressed more extensively in the discussion of performance by jurisdiction.

As a general rule, one must exercise caution in drawing conclusions from data of this nature. While examination scores are taken directly from AICPA and NASBA records

Other than an independent determination of first-time status for those candidates registering through NASBA's CPA Examination Services Division, no attempt has been made to verify candidate representations, nor to edit the candidate data for reasonableness. Undoubtedly, there are situations where candidates intentionally or unintentionally omit or misrepresent data. As noted where appropriate, such misstatements probably vary based on the characteristic involved.

In addition to the problems of inaccurate or incomplete candidate questionnaires, there are also instances when candidates do not submit questionnaires or the questionnaires are not forwarded to NASBA. Missing questionnaires do not change results to a great extent, since overall participation still is high. Reports 1 through 4 are drawn from AICPA and NASBA records (to the extent possible) and thus include all candidates by jurisdiction. Missing and inaccurate questionnaires primarily affect tabular reports 5 through 13, some of which show the number of candidates "not answering." In particular, missing questionnaires result in misstatement of the participation and passing percentages shown for individual colleges and universities in Reports 12 and 13. In addition, the possible impact of missing or misreported questionnaire data is discussed as appropriate throughout this report.

As in prior years, this commentary has been prepared by Park E. Leathers, Ph.D., CPA, Ernst & Young Professor Emeritus at Bowling Green State University. The comments are those of Professor Leathers and do not represent an official interpretation of the data by NASBA.

TRENDS IN EXAMINATION PARTICIPATION

The decade-long decline in the number of CPA examination candidates reversed slightly in 2002 and 2003. Considering both May and November together, candidates increased 0.8 percent from 2002 to 2003, from 108,955 to 109,872. This followed a somewhat larger increase of 2.7 percent from 2001 to 2002. The number of first-time candidates was up 6.3 percent in 2003, compared to 7.5 percent in 2002, but the number of repeat candidates, which had increased slightly in 2002, declined 1.7 percent in 2003.

The increase in candidates over the 2002-03 period is encouraging, but the degree of recovery continued to be slight, and there still were 23.5 percent fewer candidates in 2003 than in 1990, the all-time high for candidate participation. Other than 2001 and 2002, 2003 had fewer candidates than any year since 1978.

The reported candidate participation for the two most recent examinations is shown on the next page.

TOTAL CPA EXAMINATION CANDIDATES

	2002	2003	Change
First-Time Candidates			
May	15,079	15,615	+3.6%
November	<u>19,788</u>	<u>21,441</u>	+8.4
Total	34,867	37,056	+6.3
Repeat Candidates			
May	35,347	34,649	-2.0%
November	<u>38,741</u>	<u>38,167</u>	-1.5
Total	74,088	72,816	-1.7
Total Candidates			
May	50,426	50,264	-0.3%
November	<u>58,529</u>	<u>59,608</u>	+1.8
Total	108,955	109,872	+0.8

Traditionally there have been slightly more CPA examination candidates in November than in May. In 1991, there was a nine percent increase from the spring to the fall. This disparity has grown over the past 12 years. In 2003 there were 18.6 percent more candidates in November than in May.

To an extent the recent decline in CPA examination candidates indicates decreasing interest in accounting as a profession and/or opportunities in public accounting. This has been strongly reinforced by the 150-hour educational requirement in many jurisdictions. Implementation of this requirement generally leads to an initial bulge in first-time candidate enrollments, followed by a sharp drop-off in these candidates. The experience of Massachusetts illustrates this pattern. This jurisdiction had 1006 first-time candidates in May 2002 and only 102 in May 2003. On a national basis, however, the effects of 150-hour implementation were relatively minor in 2003, compared to the preceding years. And this condition likely will continue, given that only a few implementations are to be effected in upcoming years. Thus a continued recovery in first-time candidates is to be expected, which eventually should lead to more repeat candidates.

The expected pattern of effects on number of first-time candidates does not prevail in all jurisdictions because of differences in implementation strategy. Some jurisdictions allow candidates with fewer than 150 hours to begin the examination process after the

implementation date provided they were qualified educationally to take the examination prior to this date. Others require 150 hours of higher education for certification (or licensure) but allow candidates to take the examination before this requirement has been fulfilled. And two jurisdictions (California and Pennsylvania) allow alternative approaches to the examination, one of which permits becoming a CPA with 120 hours of higher education, rather than 150. All three of these variations in approach defer the decline in first-time candidates, and the latter two may mitigate it permanently to some extent. These variations also make it difficult to track the effects of implementation and the expected recovery in the number of candidates. In the long run, however, the revised requirement will have an impact in all of these jurisdictions. Its effect on the number of candidates will depend upon whether potential CPAs continue to be discouraged by the higher educational standard or rise to the challenge and increasingly embrace it.

Another factor affecting the pattern of examination enrollments in recent years is that candidates are taking greater advantage of an absence of residency requirements to take the examination in other jurisdictions. In some instances this may be a strategy to avoid (or delay) the consequences of the 150-hour requirement. In addition, some jurisdictions are benefiting from an influx of foreign candidates interested in fulfilling CPA requirements. A comparison of Reports 12A to 12D for 2003 with 1994, the first year these particular data were reported, shows that the portion of candidates citing education at a foreign institution had risen from 2.6 percent to a reported 12.8 percent.

To provide insight into changes in the candidate population over the past decade, the number of total candidates for 1991 was compared, by jurisdiction, with those for 2003. In 1991, just one jurisdiction (Florida) required 150 hours of higher education before taking the examination. By 2003 over three quarters of the jurisdictions had implemented this requirement, at least in part.

There were 140,000 candidates in 1991 compared to 109,900 in 2003, a decline of 21.5 percent. Among the 54 jurisdictions, 39 showed declines in total candidates from 1991 to 2003. This included nearly all of the jurisdictions that had fully implemented the 150-hour educational requirement by 2003, but six of them showed increases—Alaska, Guam, Hawaii, Idaho, Kentucky, and Maine. Eight of the non-implementing jurisdictions were up, but three (Arizona, Minnesota, and New York) showed declines over 10 percent in total candidates. The two partial implementers were split, California showing a small increase in total candidates (from 1991) and Pennsylvania a substantial decrease. On an overall basis, however, it must be concluded that the 150-hour requirement has had a significant effect in many jurisdictions, though other factors likely are involved in the nationwide decline in candidates.

The 15 jurisdictions with increases in total candidates from 1991 to 2003 included four (Delaware, Guam, New Hampshire, and Vermont) that appear to have benefited

significantly from non-resident candidates. Together these four had total enrollments that increased nearly 10-fold, from 1,015 in 1991 to 9,702 in 2003.

An important question for the CPA profession is how the 150-hour educational requirement will affect the number of examination candidates in the long-term. Recovery thus far has been slow. In previous discussions of these data (most recently last year), a table was presented which summarized first-time examination participation for 11 jurisdictions (Alabama, Arkansas, Georgia, Kansas, Louisiana, Mississippi, Nebraska, South Carolina, South Dakota, Tennessee, and Utah), all of which implemented the 150-hour requirement in the mid-to-late 1990s. The table compared participation for a “normal” pre-implementation year with the last two examinations before implementation, the first two after implementation, and in each of the preceding three years. The table showed that the number of first-time candidates increased fairly rapidly in these jurisdictions after implementation and was up over 80 percent by 2000. Unfortunately, this growth rate was achieved from the low number of candidates immediately after implementation, and there was virtually no growth in 2001 and fairly modest growth (five percent) in 2002. Thus the number of first-time candidates for these jurisdictions remained at only 41 percent of the total for the “normal” pre-implementation year.

A comparison of total candidates in these 11 jurisdictions for 2002 and 2003 showed more substantial recovery in the latter year—an increase of 12.3 percent in first-time candidates and 3.5 percent in total candidates, both well above the national average. This reinforces last year’s conclusion of a partial recovery in number of candidates in jurisdictions that have implemented the 150-hour requirement.

Offsetting future improvements in the number of candidates in implemented jurisdictions will be the negative effects from the half dozen jurisdictions which plan to implement the 150-hour requirement later this decade, most notably New York in 2009. Another factor is the revised examination format and delivery mode being implemented in 2004. No attempt has been made to predict the impact of the latter on examination participation. Nor can one reliably assess the even more important factors of potential changes in future opportunities in public accounting and the interest of potential candidates in accounting as a profession.

A NATIONAL VIEW OF PERFORMANCE

Jurisdictional and national passing percentages by subject and overall are presented in Reports 1, 2, and 3. National percentages for the past two years are summarized below and compared to the 1994-01 period. For purposes of this summary, the passing percentages for May and November have been combined (weighted by number of candidates at each examination).

NATIONAL PASSING PERCENTAGES BY SUBJECT AND OVERALL

	1994-2001	2002	2003
First-Time Candidates			
Auditing (AUDIT)	30.0%	33.1%	32.9%
Business Law and Professional Responsibilities (LPR)	31.7	36.8	38.5
Financial Accounting & Reporting - Business Enterprises (FARE)	29.5	31.4	32.5
Accounting & Reporting - Other Areas (ARE)	28.6	32.1	33.8
All subjects taken	16.0%	19.0%	20.1%
Some subject(s), not all	<u>29.2</u>	<u>29.6</u>	<u>30.1</u>
All or some subjects	45.2	48.6	50.2
No subjects	54.8	51.4	49.8
Repeat Candidates			
Auditing (AUDIT)	33.3%	33.7%	32.9%
Business Law and Professional Responsibilities (LPR)	33.9	33.5	33.1
Financial Accounting & Reporting - Business Enterprises (FARE)	28.0	25.2	27.4
Accounting & Reporting - Other Areas (ARE)	30.3	29.9	30.4
All subjects taken	27.7%	25.7%	26.9%
Some subject(s), not all	<u>28.0</u>	<u>28.5</u>	<u>28.2</u>
All or some subjects	55.7	54.2	55.1
No subjects	44.3	45.8	44.9

NATIONAL PASSING PERCENTAGES BY SUBJECT AND OVERALL, continued

	1994-2001	2002	2003
All Candidates			
Auditing (AUDIT)	31.9%	33.4%	32.9%
Business Law & Professional Responsibilities (LPR)	33.0	34.8	35.4
Financial Accounting & Reporting - Business Enterprises (FARE)	28.6	27.6	29.4
Accounting & Reporting - Other Areas (ARE)	29.6	30.7	31.9
All subjects taken	23.6%	23.6%	24.6%
Some subject(s), not all	<u>28.4</u>	<u>28.9</u>	<u>28.9</u>
All or some subjects	52.0	52.5	53.5
No subjects	48.0	47.5	47.5

First-time candidates did well in 2003, both in comparison to 2002 and to the overall averages for 1994 to 2001 (1994 was the year of adoption for the examination subject format used through 2003). As in 2001 and 2002, passing percentages for the year were higher in each individual subject, with the exception of Auditing (down slightly in 2003). The all-subject pass rate also was up, a percentage point from 2002 and four percentage points from 1994-2001. The number of first-time candidates passing at least one subject rose from 45 percent in 1994-2001 to 50 percent in 2003. These improved percentages are an indication that the 150-hour educational requirement is paying dividends in terms of improved examination performance.

On the other hand, passing percentages for repeat candidates have changed relatively little in recent years, and except in the ARE examination, the level of performance remains below that experienced from 1994 to 2001. Presumably the 150-hour educational requirement will eventually enhance these scores as well, but the effect will take time as the lesser-prepared candidates work their way through the system.

Among the four subjects, LPR continued to be the easiest to pass, particularly for first time candidates. Consistent with recent years, the FARE examination was especially difficult for repeat candidates.

The table below (abstracted from Reports 1 and 2) compares passing percentages for the May 2003 and November 2003 examinations to the weighted averages of the percentages experienced in May and November from 1994 to 2002. For all subjects taken, first-time candidates continued to perform better in May, but the success rate on individual subjects often varied. The performance for repeat candidates typically has been near parity between May and November, but May was stronger in 2003.

COMPARISON OF MAY AND NOVEMBER PASSING PERCENTAGES

	1994-2002		2003	
	May	November	May	November
First Time Candidates				
Auditing (AUDIT)	30.4%	30.3%	33.2%	32.7%
Business Law & Professional Responsibilities (LPR)	32.1	32.3	39.5	37.7
Financial Accounting & Reporting - Business Enterprises (ARE)	30.6	28.9	32.1	32.8
Accounting & Reporting - Other Areas (ARE)	30.4	27.9	36.2	32.1
All subjects taken	16.9%	15.8%	21.4%	19.2%
Some subject(s), not all	<u>29.0</u>	<u>29.4</u>	<u>29.8</u>	<u>30.4</u>
All or some subjects	45.9	45.2	51.2	49.6
No subjects	54.1	54.8	48.8	50.4
Repeat Candidates				
Auditing (AUDIT)	33.4%	33.3%	33.0%	32.8%
Business Law & Professional Responsibilities (LPR)	32.6	35.1	34.6	31.7
Financial Accounting & Reporting - Business Enterprises (ARE)	27.1	28.4	27.0	27.8
Accounting & Reporting - Other Areas (ARE)	30.4	30.0	34.2	27.0
All subjects taken	27.9%	27.1%	28.1%	25.9%
Some subject(s), not all	<u>27.2</u>	<u>28.9</u>	<u>28.8</u>	<u>27.7</u>
All or some subjects	55.1	56.0	56.9	53.6
No subjects	44.9	44.0	43.1	46.4

Passing percentages for first-time candidates have been affected by the pattern of jurisdictions implementing the 150-hour requirement. Candidates rush to take the examination when the requirement is imminent. Many times this is without adequate preparation, thus resulting in a lower pass rate. In those years when many (and/or large) jurisdictions are about to implement the higher educational requirement, the adverse passing percentages in these states have pulled down the national average. Once this flurry of candidates has passed and the new educational requirements are in place, passing percentages have rebounded. Over time, hopefully, the passing rates in the 150-hour jurisdictions will exceed the normal ones previously prevailing, assuming that more formal education translates into better examination scores. This is not a foregone conclusion, since the 150-hour requirement is directed toward enhancement of general skills, not necessarily to the development of accounting knowledge and improvement of CPA examination performance. Nevertheless, one would expect performance to improve relatively in those jurisdictions implementing the 150-hour requirement, if only because the higher standard may be expected to generate a more motivated and qualified candidate.

A comparison of the 2003 first-time passing rates to those prevailing 12 years before, in 1991, provides evidence of improved performance. The composite 1991 all-subject passing rate of 17.8 percent (for all jurisdictions) rose to 20.1 percent in 2003, and this may understate the degree of improvement. This is because the 1991 passing rate was higher than that prevailing after the examination format was changed in 1994—the composite all-subject passing rate having declined to 15.8 percent for the 1994-2000 period. In addition, a disaggregation of the jurisdictions shows that those implementing the 150-hour requirement in the past 12 years have done relatively better in the all-subject passing rate, at least in comparison to where they were in 1991.

The number of jurisdictions implementing the requirement, at least in part, rose from one (Florida) in 1991 to 43 by the time of the November 2003 examination. This includes California and Pennsylvania, nominal implementers who still allow some candidates to become CPAs with 120 hours of higher education. Not all of the other jurisdictions have implemented fully, i.e., some are requiring 150 hours only for certification (not to take the examination) or making other exceptions that allow candidates to sit without meeting the higher educational requirement. These latter differences have been ignored, but California and Pennsylvania have been grouped with the 11 jurisdictions which had not yet implemented the higher educational requirement for comparison to the remaining 41 implementing jurisdictions.

These 41 jurisdictions had 33,520 first-time candidates in 1991, 62.3 percent of all first-time candidates in that year. This enrollment declined 45.5 percent over the next ten years, to 18,253 first-time candidates in 2003 (49.3 percent of the total). Of these 41 jurisdictions, 35 showed declines in first-time candidates; only Alaska, Florida, Guam, Hawaii, Guam and Utah had increases. Meantime, eight of the 13 non-implementing

jurisdictions experienced increases in first-time candidates. The number of first-time candidates declines for these 13 jurisdictions in total, but only from 20,243 to 18,803 (seven percent), and their share of the first-time candidate pool rose from 37.7 percent in 1991 to 50.7 percent in 2003.

The 2003 passing percentages for these two groups favored the 41 implementing jurisdictions. Their all-subject rate for first-time candidates was 22 percent, compared to 18.3 percent for the other 13 jurisdictions. Looking back to 1991, moreover, shows that the 41 implementing jurisdictions increased from a composite 15.7 passing percentage in that year while the other 15 jurisdictions declined from 21.5 percent. Thus the implementing jurisdictions rose from an index value of .88 in 1991 to 1.09 in 2003 (based upon the ratios of their composite passing rates to the national passing percentage for first-time candidates). This is a significantly better relative performance than that achieved by the other 13 jurisdictions, whose index value declined from 1.20 in 1991 to .91 in 2003.

The following table provides additional support for a conclusion of improved passing percentages in jurisdictions that have implemented the 150-hour requirement. It presents data for the 11 jurisdictions whose first-time candidate participation was described in the previous section. They have been divided between a group of five jurisdictions (Alabama, Louisiana, Mississippi, Tennessee, and Utah) which implemented the 150-hour educational requirement in the mid-1990s and another group of six jurisdictions that includes Kansas (implementing in November 1997) and Arkansas, Georgia, Nebraska, South Carolina, and South Dakota (all implementing in May 1998). The table compares “normal” pre-implementation all-subject passing rates in these jurisdictions, where “normal” is defined as the third and fourth examinations prior to implementation, with passing rates in the last two examinations before implementation, the first two after implementation and those prevailing in 1991, 2000, 2002 and 2003. In both cases the pattern follows the anticipated effects of 150-hour implementation on passing rates—a sharp decline before implementation and a rebound in the following periods. There has been no improvement since 2000 for one group and only modest improvement for the other, but the 2003 passing rates remain well above those prevailing in 1991.

For the second group of jurisdictions, the table shows the ratio of composite passing rates to the national average for the period involved. In 1991, the passing rate ratio was .85, i.e., 85 percent of the national average. During the “normal” pre-implementation period, it was .96. The ratio dipped to .65 in the two examinations before implementation but has exceeded 1.0 since then, indicating that the composite average for these six jurisdic-

tions has been above the national average. The ratio declined in 2001 but rebounded in the past two years.

Because several different implementation dates were involved, it was not practicable to compare all of the ratios for the group of five jurisdictions. However, its ratio for 1991 was .61. It rose to 1.23 in 1999, and was 1.00 in 2000, .80 in 2002 and .83 in 2003. The index has declined in recent years as other jurisdictions upgrade educational requirements, but its level still represents an improvement over the relative performance in 1991.

COMPARATIVE FIRST-TIME PASSING PERCENTAGES FOR 11 SELECTED JURISDICTIONS

	Five Implementations In mid-1990s	Six Implementations in 1997-1998	
	Rate	Rate	Ratio
Passing rate for these jurisdictions in 1991	11.0%	15.1%	.85
Passing rate for third and fourth examinations prior to implementation of 150-hour requirement	11.7	15.3	.96
Passing rate for last two examinations before implementation of 150-hour requirement	8.1	8.9	.65
Passing rate for first two examinations after implementation of 150-hour requirement	16.5	18.8	1.16
Passing rate for these jurisdictions in 2000	16.7	21.5	1.29
Passing rate for these jurisdictions in 2002	15.3	21.6	1.13
Passing rate for these jurisdictions in 2003	16.7	23.3	1.16

Note: Passing rates are the percentages of first-time candidates passing all subjects taken, weighted by the number of first-time candidates in the jurisdiction.

Report 4 summarizes the performance of candidates taking all four subjects and passing all four subjects by jurisdiction and in total. It shows that 58 percent of all May 2003 candidates and 64 percent of all November 2003 candidates took all four subjects, and 12 percent of these candidates passed all four. As in the past, the 2003 passing percentages for candidates taking all four subjects were lower than those for first-time candidates passing all subjects (Report 1). Although some of this difference may arise because some candidates take fewer than four subjects (as discussed in the next section), primarily it indicates that repeat candidates who take all four subjects often are not as well-prepared as first-time candidates as a group.

PERFORMANCE BY JURISDICTION

After each examination, NASBA recognizes as "honor roll states" those jurisdictions whose candidates have achieved passing grades in every subject at a rate higher than the national average. The honor roll states for 2003 are presented below.

HONOR ROLL STATES

MAY 2003		NOVEMBER 2003	
Arizona	Missouri	Alaska	Missouri
California	Montana	California	New Hampshire
Colorado	Nevada	Colorado	Texas
Florida	North Carolina	Florida	Utah
Georgia	Oregon	Illinois	Vermont
Illinois	Utah	Iowa	Washington
Iowa	Vermont	Kansas	Wisconsin
Maine	Washington	Michigan	
Minnesota	Wisconsin	Minnesota	

Not surprisingly, many of the above states appear among the top performers in the tables presented below. However, a jurisdiction's candidates may perform very well on a particular subject but below average on one or more other subjects, thus not achieving the honor roll designation for that state.

In the first table below, the 10 highest ranking jurisdictions are listed by overall success of first-time candidates passing all subjects taken. The other four tables show the five jurisdictions with the highest rankings by examination subject.

These data are presented only as a matter of interest, and conclusions as to quality should be avoided. Many factors, in addition to candidate ability and preparation, affect the performance of a jurisdiction's candidates. These include variations in eligibility to take the examination (particularly in relation to academic background), the number of subjects for which the candidate may register, and conditioning requirements.

Of the 15 jurisdictions listed in one or both of the listings of highest-ranking jurisdictions for candidates passing all subjects, nine appeared on the May or November list in 2002.

SUCCESS RANKING BY JURISDICTION

First-Time Candidates Passing All Subjects Taken

In almost all of the 54 CPA examination jurisdictions, candidates are required to take all subjects not previously conditioned. This means that first-time candidates in these jurisdictions take all four examination subjects and repeat candidates without conditional credit for any subjects also must take all four subjects. Therefore, the majority of candidates in these jurisdictions generally are taking all four subjects. The exact proportion in a particular jurisdiction depends upon the relative number of first-time candidates and how many of the repeat candidates have earned conditional credit.

Jurisdictions where candidates take fewer than all remaining subjects have an advantage in passing rates, particularly the all-subjects rate. Other things equal, candidates who take fewer than four subjects are more likely to pass all of them than if they take all four subjects at once. The "all subjects passed" percentage is based on the number of subjects taken, and a candidate passing two subjects of two taken is treated the same as one passing four of four. Candidates who take fewer than four subjects also should perform better on individual subjects because they can concentrate on preparation for just these subjects. This circumstance causes a degree of incomparability in Reports 1 to 3 and is the basis for providing Report 4, which compares the number of candidates taking all subjects to total candidates in each jurisdiction and shows the percentage of these candidates who achieved examination success on all four subjects.

The following table (drawn from Report 4) lists the highest-ranked jurisdictions in terms of percentage of candidates taking all four subjects and passing all four subjects. There is considerable congruence between this ranking and the first table in this section of the report, which lists the top 10 jurisdictions for first-time candidates passing all subjects taken. For both May and November, eight of the 10 jurisdictions listed below appear on the earlier list.

COLLEGE AND UNIVERSITY DATA

Graduates from more than 1,000 college and universities are represented among the candidates for the Uniform CPA Examination. (See the School Index, Report 13, for a complete listing of the schools and the total number of candidates from each school.) NASBA summarizes examination performance (by subject and overall) for each school with five or more candidates in a particular category. These data are presented in the following statistical reports:

- 12-A First-time Candidates Without Advanced Degrees by School
- 12-B First-time Candidates With Advanced Degrees by School
- 12-C Repeat Candidates Without Advanced Degrees by School
- 12-D Repeat Candidates With Advanced Degrees by School

In reporting these data, NASBA does not claim that CPA examination passing rates (or the rankings below) are indices to overall educational quality. Nor does it believe that an institution's primary purpose is to prepare candidates for the CPA examination, or that

schools should necessarily concentrate on improving their relative standings. Moreover, many of the factors affecting examination performance are beyond the control of the accounting faculty. These include the general scholastic ability of the institution's students, the number and relative ability of the students from that institution who take the examination, the time lapse from graduation before candidates choose to take the examination, other formal and informal preparation undertaken by candidates, the university's general educational requirements and preparation, and the jurisdiction's requirements for examination eligibility and conditioning.

On the other hand, there is wide interest in these data. Schools are understandably curious about how they performed and how they compare to their peers. In the absence of this survey, the information likely will be collected and reported in an ad hoc, less comprehensive manner. There also will be pressure on state boards of accountancy to produce these data and rankings, as many once did. The purpose of NASBA's reporting is to provide information. The importance to be attached to this information, and the use to be made of it, if any, is left to the individual reader.

INSTITUTIONAL REPRESENTATION

California State University-Hayward had the most first candidates without advanced degrees in both May and November 2003, reinforcing its strong participation in the preceding ten examinations, when it finished first, second, or third in number of first-time candidates. Five other schools appeared on both the May and November listings. This includes two that have benefited from programs for out-of-jurisdiction candidates—the University of Guam and Montana State University-Billings. Other institutions with the most first-time candidates without advanced degrees tended to be from jurisdictions that have not adopted (or not fully implemented) the 150-hour requirement, especially California, which had two institutions on the May 2003 list and four institutions in November 2003.

The University of Texas-Austin again had the most first-time May 2003 candidates with advanced degrees. It has led the May listing since 1995 but has been closely followed by the University of Illinois-Urbana/Champagne in the past two years. Brigham Young University, the advanced-degree November leader in five of the six preceding years, continued in that position in November 2003. The University of Texas-Austin was second, as it was in November 2001 and November 2002. These two institutions, the University of Notre Dame and Texas A & M University were listed in both May and November 2003, the latter giving Texas a second representative each time. In addition, North Carolina had four institutional representatives in May 2003, and Florida had two in November 2003.

The ranking below summarizes the colleges and universities with the most 2003 first-time candidates at each examination. Based upon the submitted questionnaires, there were 96 institutions with 20 or more first-time candidates without advanced degrees in May 2003 and 162 in November 2003. These totals are higher than in recent years, in part because of more complete reporting in 2003 but also indicating that candidates often fulfill the 150-hour requirement without achieving advanced degrees. There were 78 institutions in May 2003 with 10 or more first-time candidates with advanced degrees and 117 in November 2003—up about a third from 2002, in part once again because relatively more questionnaires were received and processed.

INSTITUTIONAL PASSING RATES

The schools with highest passing percentages for first-time candidates on individual examination subjects are listed below for the May 2003 and November 2003 examinations. To be eligible for inclusion, an institution needed at least 20 candidates with baccalaureate degrees or 10 candidates with advanced degrees. Schools were excluded if it was determined that there were fewer than the required number of candidates on the subject involved.

The following table lists the schools whose first-time candidates had the highest passing rates for all subjects taken, including the 10 highest schools whose candidates did not receive advanced degrees and the 10 whose candidates did. To be eligible for the lists, an institution must have had at least 20 graduates with baccalaureate degrees among its first-time candidates or 10 first-time candidates with advanced degrees.

The earlier comments on mandatory participation of first-time candidates in all four subjects apply here. Schools may have a reporting advantage, certainly in terms of percentages passing all subjects taken and somewhat on individual subjects, if their

percentages passing all subjects taken and somewhat on individual subjects, if their graduates take the examination in one of the jurisdictions that do not require that first-time candidates take all four subjects. To compensate for this factor, at least in part, schools have been omitted from the all-subject listing below if the data indicate that more than 10 percent of the jurisdiction's first-time candidates did not take the subjects for which eligible.

It is appropriate to give Honorable Mention to institutions, with 15 or more first-time candidates without advanced degrees, provided they would have been presented in the all-subject ranking if they had 20 or more candidates. These institutions, listed in order of all-subject passing percentage, the University of Missouri-St. Louis, the University of Wisconsin-Eau Claire, Idaho State University, the University of Notre Dame, Grand Valley State University, Southwest Missouri State University, the University of Miami, the University of Wisconsin-Whitewater, and the University of Colorado-Boulder (from the May 2003 examination) and Georgetown University, Tulane University of Louisiana, the University of Colorado-Boulder, the University of Pennsylvania, Marquette University, Saint John's University (Minnesota), and Minnesota State University-Mankato (from the November 2003 examination).

In the ranking of institutions with 20 or more first-time candidates without advanced degrees in May 2003, two institutions from Missouri (the University of Missouri-Columbia and Truman State University) displaced the University of Northern Iowa, which finished first in May 2002 and among the May "Top-Ten" in each of the past 10 years. In November 2003 Appalachian State University rose to first from tenth in November 2002, replacing the University of Wisconsin-La Crosse, another institution which has done well historically, appearing on nine of the last 10 November lists. Four institutions (Texas A & M University, the University of Florida, the University of Iowa, and the University of Wisconsin-Madison) were on both the May and November 2003 listings. Altogether there were 13 jurisdictions represented on the two lists. Besides its two placements in May 2003, Missouri had two honorable mentions. Iowa had two institutions on the May list, and Wisconsin had one, with two honorable mentions. In November 2003, there were two placements for New Jersey and Wisconsin (plus an honorable mention in the latter case), as well as two honorable mentions for Minnesota.

Among institutions with 10 or more first-time candidates with advanced degrees, the University of South Florida and the University of Wisconsin-Madison finished one-two in both May and November 2003, maintaining a long tradition of strong performances by these two schools. The University of Florida, the University of Houston and the University of Iowa also placed on both listings. Wake Forest University finished fourth in May 2003, the first May since 1996 that it has not been first or second. Eleven different jurisdictions were represented on these two lists. In addition to Florida, represented twice both times, Iowa and Montana had two listings in May 2003 and Texas had two in November 2003.

Most of the institutions cited on the "Top-10" lists have been previously ranked. Many schools are listed year after year. The following table recognizes those schools that have been ranked highly (or received honorable mention) four or more times during the past ten years (20 examinations) from 1994 to 2003. These rankings were based upon percentages of first-time candidates passing all subjects taken. The lists included 10 undergraduate institutions in all years but only five graduate institutions prior to 1998.

CHARACTERISTICS OF CANDIDATES

A primary impetus for this survey is to gather information on the characteristics of the CPA examination candidate population, relate these characteristics to examination performance, and identify changes and trends in the pattern of characteristics. Three questions on the candidate questionnaire address the nature of the candidate's educational background. The first of these, summarized in Report 5, asks for academic degrees earned to date or expected to be earned in the 120 days subsequent to the examination. The second (Report 6) requests total semester hours earned or to be earned in the 120 days subsequent to the examination. The third (Report 7) relates to semester hours in accounting earned or to be earned within 120 days. Other questions in the questionnaire gather data on academic aptitude examination scores—the SAT, the ACT, the GRE, and the GMAT (Reports 8 and 9), participation in CPA examination coaching courses (Report 10), and the timing of the candidate's decision to major in accounting (Report 11).

LEVEL OF EDUCATION

The number of candidates with advanced degrees grew in 2003. There were 8,626 first-time candidates with advanced degrees (considering both the May and November examinations together). This constituted 25.2 percent of the reporting candidates and represented an increase from 7,272 candidates in 2002 (28.1 of the total reporting), 6,033 in 2000 (18.6 percent) and 4,065 in 1990 (10.2 percent). There were many more non-reporting first-time candidates in 2002. Assuming that most of them were not advanced degree holders, which seems likely, this implies that the 2002 percentage of advanced degree holders may have been overstated and that the 2003 percentage has declined less than shown.

The proportion of repeat candidates with advanced degrees increased from 18.9 percent in 2002 to 19.4 percent in 2003 but remained below the percentage for first-time candidates. This is because (1) advanced degree holders are more likely to pass all subjects on the first attempt, and (2) repeat candidates who begin taking the examination before the

150-hour requirement becomes effective in a particular jurisdiction generally are allowed to complete the examination within a statutory period, even though they do not have 150 hours of academic education.

The following table compares the types of degrees held by first-time candidates holding advanced-degrees in 2003 with the breakdown in 1990, 1995 and 2000. Over the 13-year period, there has been a movement away from the MBA degree, particularly the MBA with accounting emphasis, in favor of the master's in accounting. Law degrees also have decreased, but the percentage of non-business masters has increased, and the non-accounting MBA has come back somewhat since 2000. Note that the absolute numbers of all of these degrees have increased since 1990 (with the exception of the law degree). It is only their percentages of all advanced degrees that have decreased in some cases, a result of the greater emphasis on the master's in accounting, which increased from three percent of the reporting first-time candidates in 1990 to 14 percent in 2003.

TYPES OF DEGREES HELD BY FIRST-TIME CANDIDATES WITH ADVANCED DEGREES

	1990	1995	2000	2003
Doctoral	1.0%	1.0%	.7%	.8%
Master's in accounting	31.0	47.3	57.5	56.2
MBA with accounting emphasis	25.2	19.0	14.8	12.5
MBA with other emphasis	32.6	24.7	19.2	22.0
Non-business master's	5.8	5.3	5.3	6.9
Law degree	<u>4.4</u>	<u>2.7</u>	<u>2.5</u>	<u>1.6</u>
TOTAL	100.0%	100.0%	100.0%	100.0%

Completion of an advanced degree is associated with strong CPA examination performance, particularly for first-time candidates. In 2003, 30.1 percent of first-time candidates holding advanced degrees passed all subjects. This compares to 17.1 percent for candidates with bachelor's degrees only. Among the three major advanced degrees, the leading performers were holders of the master of accountancy—33.3 percent passed all subjects. Holders of the MBA trailed somewhat, those with a concentration in accounting achieving a 26.2 percent pass rate and the other first-time candidates with MBAs a pass rate of 24.6 percent. As a group, the holders of non-business masters, law degrees, and the Ph.D. had an all-subject pass rate of 28.5 percent. The 2003 pass rate for the master of accountancy was about the same as for 2002, the accounting MBA was up from the preceding year, and the non-accounting MBA was down. The composite passing percentage for the other three degrees increased in 2003.

The following table shows the 2003 first-time passing percentages for individual subjects, based upon the candidates' educational backgrounds. By and large, holders of the master's in accounting and the doctorate were the best performers, achieving the highest and second highest percentages on all subjects with the exception of the LPR examina-

tion where (not surprisingly) the holders of law degrees were first. The last line of this table shows the ratio of passing percentages for all advanced degree holders to those for holders of bachelor's degrees. The advanced degree holders showed substantial superiority in all subjects.

**FIRST-TIME PASSING RATES FOR INDIVIDUAL CPA EXAMINATION SUBJECTS
BASED UPON EDUCATIONAL BACKGROUND
2003**

TOTAL SEMESTER HOURS

Of the reporting first-time candidates in 2003, 57 percent indicated 150 or more semester hours of academic study, and nearly a quarter indicated 160 hours or more. This was down slightly from 2002 but still constituted a major increase from 1995, when the corresponding figures were 31 percent and 19 percent. Just under 32 percent of the first-time candidates reported 130 or fewer hours in 2003, and only 3.6 percent reported fewer than 120.

The average for all first-time candidates was 145.8 semester hours, down from 148.3 hours in 2002 but up from 143.7 in 2000. Semester hours for repeat candidates also declined slightly, to 142.4 hours in 2003, compared to 143.4 in 2002 and 140.5 in 2000. Portions of the declines from 2002 probably occurred because relatively more questionnaires were received from candidates without advanced degrees in 2003. Semester hours for repeat candidates are lower than for first-time candidates because advanced degree holders are more likely to pass all subjects on the first attempt and repeat candidates in 150-hour jurisdictions often are allowed to continue sitting for the examination within a statutory period, even though they do not meet the new educational requirement.

Among first-time candidates, there was a clear-cut performance advantage if one had more than 150 hours of higher education. This is consistent with the superiority associated with advanced degrees. First-time candidates with more than 150 hours had a 51 percent better chance to pass all subjects when compared to those with fewer than 150 hours. This benefit is lower than in 2002 but higher than in 2000 and 2001. The advanced-degree advantage for repeat candidates was 11 percent, compared to seven percent in 2001

and 2002. The latter advantage is relatively minor compared to the disparity for first-time candidates and results because bachelor degree holders achieve higher passing percentages when they repeat the examination and also because better prepared advanced degree holders tend to pass all subjects the first time, thus eliminating themselves from the repeat candidate pool.

Semester hours are subject to reporting error. Besides the normal risk of misunderstanding instructions or lack of correct recall, there also is a danger that the candidate will incorrectly convert quarter hours to semester hours or fail to make this conversion when needed.

SEMESTER HOURS OF ACCOUNTING

First-time candidates with advanced degrees reported an average of 36.4 semester hours of accounting in 2003, compared to 36.1 in 2001 and 36.5 in 2002. This slow rate of change is consistent with that experienced in recent years. The average reported for first-time candidates without advanced degrees continued to rise slightly, to 31.4 semester hours from 30.3 in 2001 and 30.8 in 2002. In both cases it is likely that these hours are overstated to an extent, given the possibility of reporting error discussed in the previous section.

Advanced degree holders with more than 30 hours of accounting had a 13 percent better chance to pass all subjects taken on the first attempt, and bachelor degree holders with more than 30 hours had a 12 percent advantage. These are greater advantages than experienced historically, especially for the bachelor's holders.

SCORES ON ACADEMIC APTITUDE EXAMINATIONS

NASBA reports candidate scores on the Scholastic Aptitude Test (SAT), the American College Testing examination (ACT), the Graduate Record Examination (GRE) and the Graduate Management Admissions Test (GMAT). Scores and relationships to CPA examination performance for first-time candidates are presented in Report 8 for the SAT and the ACT and in Report 9 for the GRE and the GMAT. A substantial number of first-time candidates report on the SAT or ACT, and on the GMAT. Report 9 shows that far fewer of them have taken the GRE.

It is probable that the scores reported by candidates are biased upward (not only in 2003 but also in prior years). These scores are difficult to remember, and some candidates may feel it to their advantage to intentionally overstate performance. This measurement bias, if it occurs, tends to diminish the observed relationship between examination performance and the academic aptitude scores, a relationship which still is substantial. An

With this caution, the estimated weighted average scores on these academic achievement examinations are compared with preceding years in the following table. Average scores on the SAT and the ACT, generally taken before admission to college, continued to rise in 2003 and compared favorably to prior years, particularly for the SAT verbal. Increases were more modest for the graduate admissions tests. The average score for the GMAT, the more widely used of these two examinations, was 3.3 percent higher than in 1994, compared to a 9.6 percent rise for the SAT verbal score and a 4.2 percent rise for the SAT mathematics score.

ESTIMATED AVERAGE SCORES FOR FIRST-TIME CANDIDATES

	1994	1997	2000	2003
SAT verbal	511	508	531	560
SAT mathematics	576	569	585	600
ACT verbal	24.1	24.3	24.6	25.1
ACT mathematics	25.4	25.3	25.4	26.1
GRE verbal	539	531	523	544
GRE quantitative	611	601	563	633
GRE analytical	593	591	596	617
GMAT	547	549	562	565

Higher scores on these examinations historically have been strongly associated with improved CPA examination performance, and this continued in 2003. This is illustrated in the following table, which shows the ratio of passing percentages for first-time candidates to passing percentages for all first-time candidates. Candidates have been divided among a high group (scores of 28 and above on the ACT or 600 and above on the other examinations), a middle group (24 to 27 on the ACT or 500-599 on the other examinations), and a low group (23 and under on the ACT or under 500 for the other examinations). A ratio of 1.0 indicates parity with the average first-time candidate, so the high ratios cited for the high groups and the low ratios for the low groups are strong indications of the effectiveness of academic aptitude examination scores as predictors of examination success.

**RATIOS OF FIRST-TIME PASSING RATES BASED ON ACADEMIC APTITUDE
EXAMINATION SCORES**

	2003		
	High Group	Middle Group	Low Group
SAT verbal	1.78	1.03	.65
SAT mathematics	1.62	.80	.38
ACT verbal	1.80	1.16	.67
ACT mathematics	1.91	1.24	.71
GRE verbal	2.52	1.71	1.17
GRE quantitative	2.26	.97	.39
GRE analytical	2.34	1.16	.50
GMAT	2.46	1.35	.64

Note: Observations for the GRE examination, particularly in the low group, vary widely among years because relatively few candidates report these scores.

SUPPLEMENTARY EXAMINATION PREPARATION

The proportion of candidates reporting participation in a CPA review course in the six months prior to the examination was down considerably in 2003. For first-time candidates, it was just below 50 percent compared to 56 percent in 2002, and 64 percent in 2001. For repeat candidates, it was 43 percent, compared to 54.5 percent in 2002 and 58 percent in 2001. (Presumably other repeat candidates participated in review courses at previous times but had not been involved just prior to the current examination.) If the level of participation in CPA review course truly is changing (i.e., if this is not an unexplained reporting anomaly), this represents a significant development. It definitely bears watching in future years.

The proprietary (privately offered) course was cited by 86 percent of first-time candidates and 90 percent of the repeat candidates who had taken courses. This domination is consistent with recent years. College-sponsored non-credit courses were reported by 10 percent of first-time candidates taking a course, and four percent of the first-time 2003 candidates (with courses) had firm-sponsored courses. For repeat candidates, firm-sponsored courses and college-sponsored courses were in each case the choice of five percent of the reporting candidates.

Two tables in this section relate the effectiveness of CPA coaching course preparation (in terms of passing percentages) to the success of candidates with no review course. The first table is based on total participation in all three types of review course, and the second details performance by type of course. In both tables, the success level for those with no course is set at 1. A score above 1.0 shows superior performance for those taking the review course, and a score below 1.0 indicates performance below the average for candidates with no course. Referring to the first table, for example, first-time 2003

candidates who had a coaching course were 37 percent more likely to pass the AUDIT examination and 40 percent more likely to pass the LPR examination, in comparison to candidates with no coaching course. The tables compare 2003 success with 2002 and with the 1994-2001 weighted average.

**RATIOS OF SUCCESS
FOR CANDIDATES PARTICIPATING IN CPA REVIEW COURSES**

	1994-2001	2002	2003
First-Time Candidates			
Auditing (AUDIT)	1.49	1.42	1.37
Business Law & Professional Responsibilities (LPR)	1.57	1.49	1.40
Financial Accounting & Reporting - Business Enterprises (FARE)	1.48	1.32	1.35
Accounting & Reporting - Other Areas (ARE)	1.52	1.46	1.39
Passing all subjects taken	1.75	1.57	1.49
Passing one or more subjects	1.36	1.32	1.28
Repeat Candidates

Passing one or more subjects	1.09	1.08	1.11

RATIOS OF SUCCESS BY TYPE OF CPA REVIEW COURSE

	1994-2001	2002	2003
First-Time Candidates			
Passing all subjects taken			
College-sponsored	1.81	1.69	1.62
Proprietary	1.75	1.56	1.48
Firm-sponsored	1.46	1.44	1.37
Passing one or more subjects			
College-sponsored	1.33	1.31	1.25
Proprietary	1.37	1.32	1.29
Firm-sponsored	1.28	1.28	1.25
Repeat Candidates			
Passing all subjects taken			
College-sponsored	.92	.88	.88
Proprietary	1.04	1.11	1.13
Firm-sponsored	1.05	1.09	1.10
Passing one or more subjects			
College-sponsored	1.03	.96	.98
Proprietary	1.09	1.09	1.12
Firm-sponsored	1.12	1.07	1.12

On an overall basis, first-time candidates with CPA review courses performed substantially better in 2003 than candidates without these courses. However, their advantage declined from 2002 and even more so from the average for 1994-2001. For repeat candidates the relative advantage from coaching courses increased slightly from the 2002 and 1994-2001 levels. The data never show as much review course benefit for repeat candidates, probably because candidates with one or two subjects to pass (the ones most likely to be successful) are less likely to take review courses in the six months prior to the examination. There is no obvious explanation why relative first-time success is declining for those with CPA review courses while repeat candidates are scoring relatively better than in the past.

All three types of coaching courses are beneficial to first-time candidates. In the 1994-2001 period, college-sponsored and proprietary courses outperformed firm-sponsored courses, with the former slightly ahead. This position continued in 2002 and 2003, at least for passing all subjects; the effects of the three course were relatively close in terms of passing one or more subjects. For 2003 repeat candidates, both proprietary and firm-sponsored courses again outperformed the college-sponsored courses.

College-sponsored courses in general are more effective for the May examination than they are in November, particularly for first-time candidates. The opposite prevails for firm-sponsored courses. As in prior years, passing percentages for proprietary courses showed more consistency between May and November than the other types of coaching courses.

Proprietary courses facilitate consistent success on all examination subjects, particularly in 2003, but their greatest relative benefit historically has been on the LPR examination. Other past observations, confirmed in 2003, were that firm-sponsored courses are most beneficial in Auditing (compared to other subjects) and that college-sponsored courses provide their greatest advantage, at least for first-time candidates, in the ARE and FARE examinations.

DECISION TO MAJOR IN ACCOUNTING

Since 1994, the candidate questionnaire has asked when candidates decided to study accounting. Report 11 relates the responses of first-time candidates to performance on the examination. Candidates were given the choices shown in the following table, which compares the responses for 2003 with the average from 1994 to 2002. The "other" choice presumably attracted those candidates who could not recall with certainty.

TIMING OF DECISION TO MAJOR IN ACCOUNTING
1994-2003

	Graduate		Undergraduate	
	1994-2002	2003	1994-2002	2003
In high school or earlier	23.6%	25.5%	37.3%	29.9%
Lower division college	27.0	30.7	36.1	34.4
Upper division college	10.7	12.0	11.5	14.3
After undergraduate degree	28.9	22.9	9.0	13.8
Other	9.8	8.9	6.1	7.6

Not surprisingly, those obtaining graduate degrees have consistently chosen accounting at a later time, and in 2003 they made their decisions later than in 2002. Nevertheless, over half of the 2003 candidates in this group had made their decisions by the end of the sophomore year, more than the average for the 1994-2001 period. However, far more of these individuals continued to be attracted to accounting (and graduate training) after baccalaureate graduation than during the last two years of the undergraduate program, a disparity which increased in 2003, reversing the trend of the previous three years.

At the undergraduate level, on the other hand, the 2003 data (consistently with the previous three years) indicate later decisions than in the past. Particularly noteworthy is the larger percentage of these candidates who decided to become accountants after the undergraduate degree, perhaps securing more education without earning another degree. Even in 2003, however, nearly two-thirds of these candidates had decided on accounting by the end of the sophomore year.

As a general rule, the later one is attracted to accounting, the better he or she performs on the CPA examination. This applies regardless of whether one obtains a graduate degree. First-time 2003 candidates who chose accounting in high school were 13 percent less likely to pass all subjects than the average candidate. Persons making the selection after the bachelor's degree had a 19 percent better chance to pass all subjects.

Although 1994 was the first year that this question was asked on the NASBA questionnaire, it was incorporated by the AICPA in a predecessor program. The former program did not differentiate between graduate and bachelor's degree holders, but an aggregation of the graduate and undergraduate responses allows the comparison presented below. The rising tendency to make a decision in high school, already a trend observed in 1980, continued through the 1997-99 period but has been reversing since then. As compared to 1994, increasing portions of the overall candidate body are deciding upon accounting in the last two years of the undergraduate program and after the bachelor's degree has been awarded. In large part this is because of the increasing emphasis upon graduate education.

HISTORICAL COMPARISON OF DECISION TO MAJOR IN ACCOUNTING

	1970	1980	1994	2003
High school or earlier	29.1%	33.8%	38.2%	31.0%
Lower division college	53.2	41.4	38.4	36.2
Upper division college	13.2	12.2	11.7	14.8
After undergraduate degree	4.5	12.6	11.7	18.0

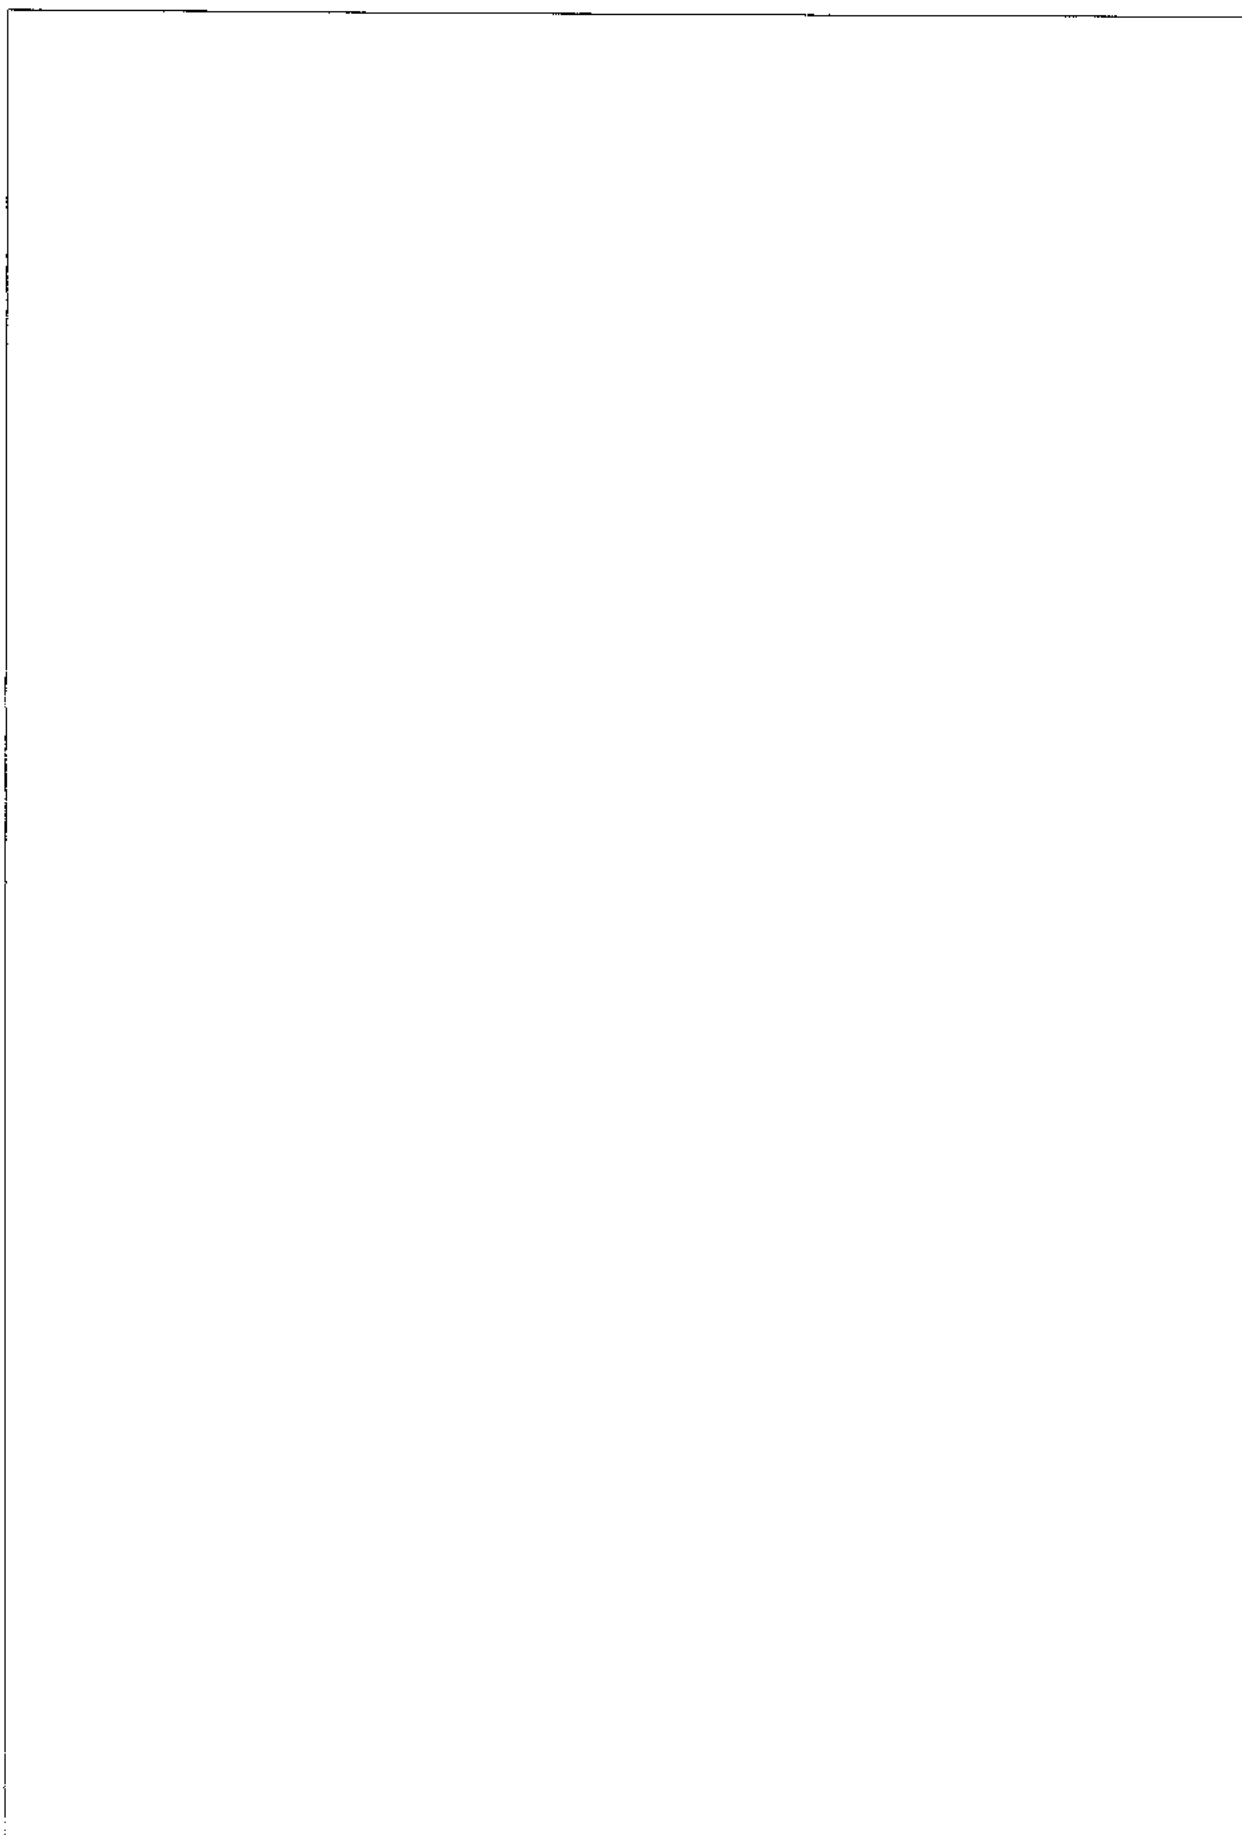

SUMMARY

The 2003 NASBA study of CPA examination candidate characteristics and performance continues a tradition begun in the early 1980's. The results often affirmed those reported in prior years, but this year's study confirmed interesting developments of recent years. First-time candidates in 2003 continued to be more likely to have advanced degrees and to report an increase in scores on academic aptitude examinations. Semester hours of higher education were slightly lower, however, reversing a recent trend. And participation in CPA review courses was much lower than in the past. Advanced degrees, more semester hours and higher academic aptitude scores all continued to be strongly associated with examination success. On the other hand, CPA review courses, while beneficial, did not contribute as much to the success of first-time 2003 candidates as they had in earlier years.

The implementation of the 150-hour educational requirement, peaking in 2000 and 2001, has had a major impact on the number of candidates and passing percentages. In general, these two effects are inversely related. As the date for imposition of these requirements approaches, candidates who cannot meet the new educational standard hurry to get into the examination system. This increase in first-time candidates tends to be accompanied by lower percentages of candidates with advanced degrees and by lower passing percentages in the jurisdictions experiencing the influx of candidates. At the succeeding examinations, the numbers of first-time candidates go down, there tend to be more advanced degrees and more semester hours of academic study, and passing rates rise.

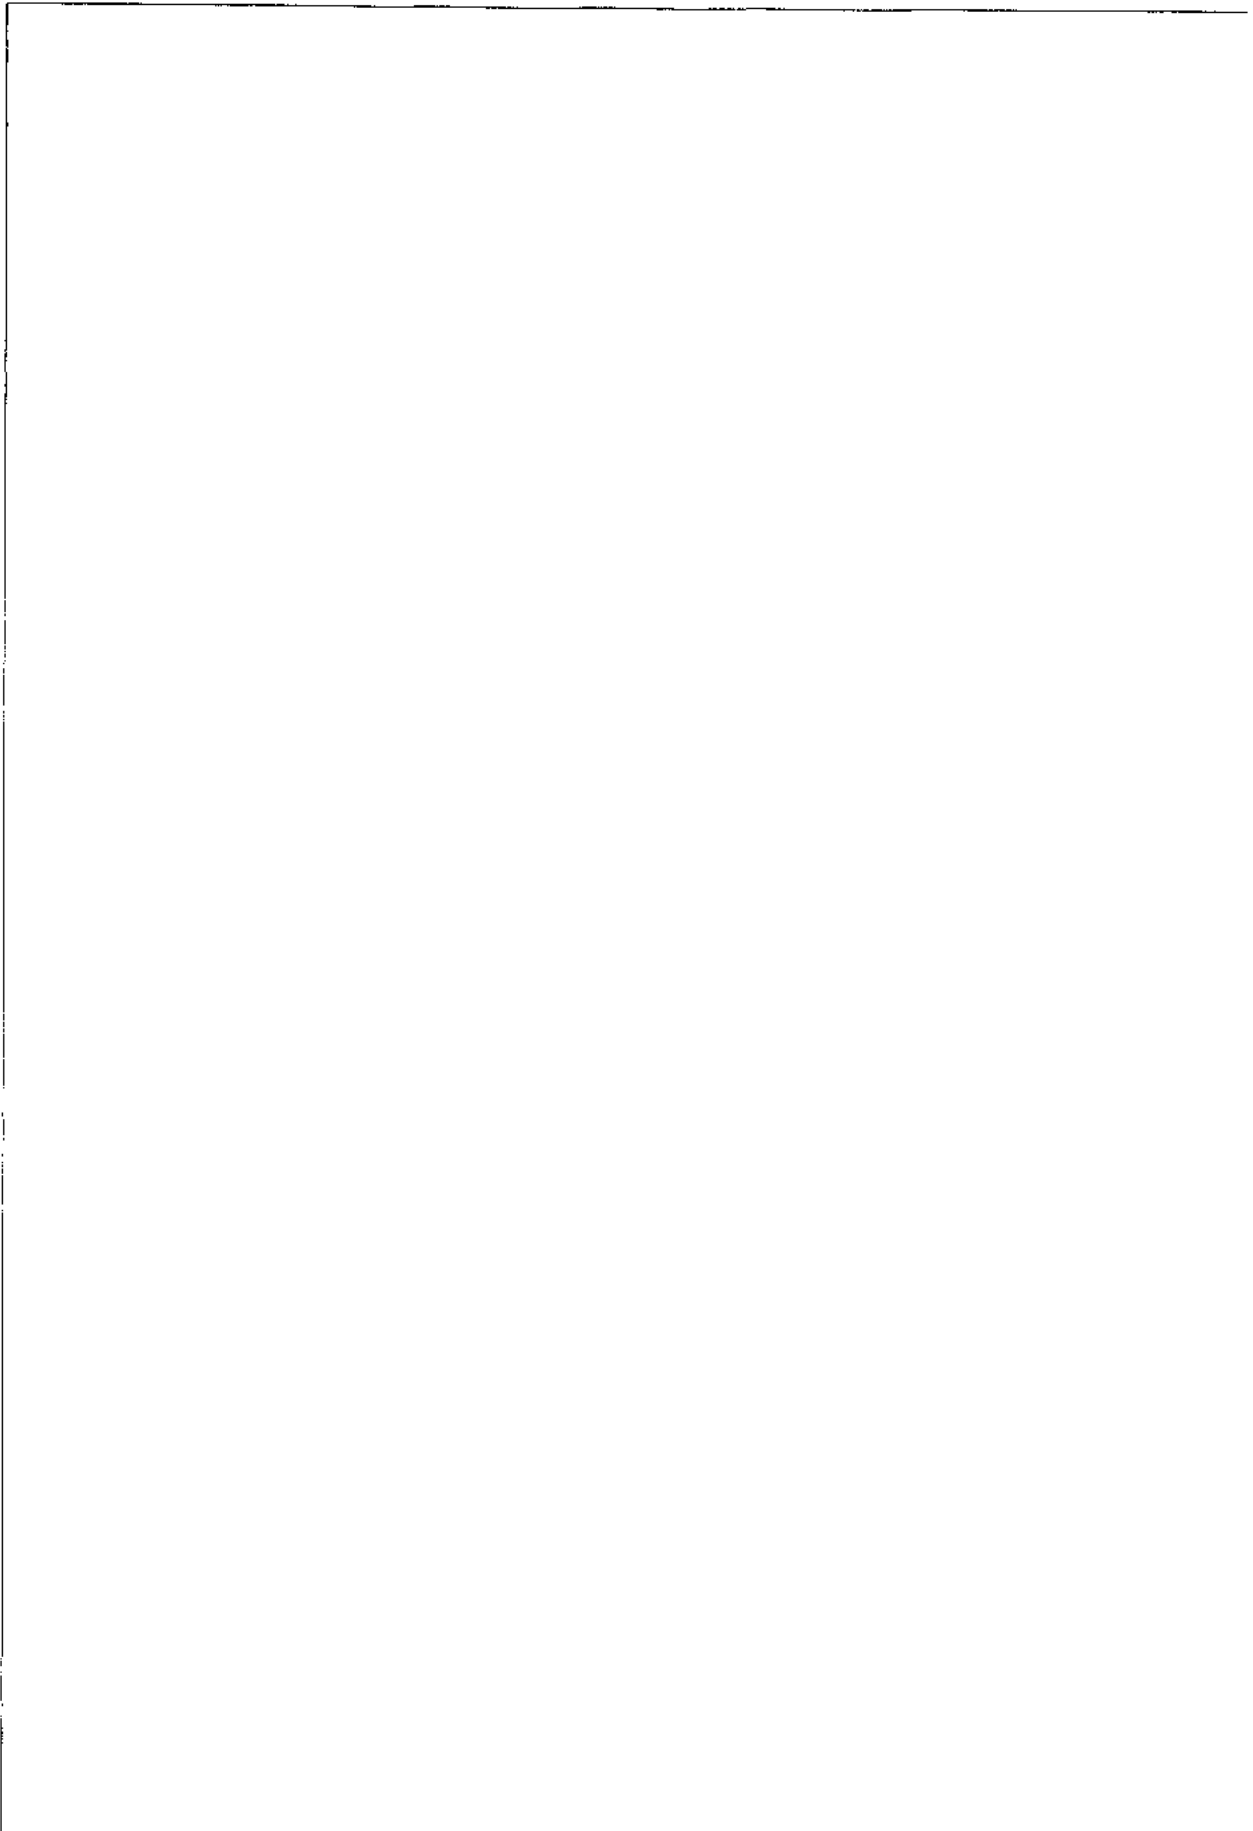

The effects of the 150-hour educational requirement were minimal in the past two years, and as a result, the numbers of first-time and repeat candidates both increased slightly, the former somewhat more than the latter. Candidate enrollment still remained 23.5 percent below the all-time peak of 1990 and may never recover to that level. Nevertheless, 2003 did represent continued improvement and hopefully will continue.

Another positive note is that implementation of the 150-hour educational requirement is leading to greater candidate success in the jurisdictions involved. As a result, the all-subject first-time passing rate (for all 54 jurisdictions) increased from 16 percent in the 1994-2001 period to 20 percent in 2003. Thus far, passing rates have not improved for repeat candidates, but these should rise as candidates entering the examination process prior to implementation of the 150-hour requirement complete their participation and more candidates meet the higher educational standard.
