Introduction

The National Association of State Boards of Accountancy (NASBA) began gathering data on CPA Examination candidates in 1982 and has published reports on performance and selected characteristics since 1985. This edition of the book covers candidate performance for the Uniform CPA Examination (Examination) for the calendar year 2004. NASBA offers these reports through the voluntary participation of candidates and their individual boards of accountancy, which provide data, and the cooperation of the American Institute of Certified Public Accountants (AICPA), which prepares and grades the Examination for the 54 US jurisdictions reported in this book.

Since 1985, Professor Park E. Leathers has worked with NASBA to analyze the data. With the move to the computerized format, Professor Leathers saw the opportunity to add this activity to others from his academic career from which he retired so that he had more time to enjoy family, travel, and leisure activities. We thank him for his many contributions to past editions of this report.

We are fortunate to have engaged two consultants whose expertise is in testing and statistics, Allan S. Cohen, Ph.D., Professor, Department of Educational Psychology and Instructional Technology, University of Georgia, and James A. Wollack, Ph.D., Associate Scientist, Testing & Evaluation Services, University of Wisconsin.

Prior to April, 2004, the Uniform CPA Examination was administered twice a year in May and November in a paper-and-pencil format. Beginning in April, 2004, the Examination format was changed to one administered in a computer adaptive format. These administrations were offered continuously for a two-month window each quarter. That is, in April and May of 2004, the Examination was offered to qualified candidates. The system was shut down in June and re-opened for a second two-month window in July and August, 2004. The last window was October and November of 2004. The information summarized in this book is for the computerized form of the Examination for the three windows in 2004.

The source of the data is also somewhat different. In the past, boards of accountancy asked candidates to complete a questionnaire which provided certain biographic and demographic information. With the advent of the computerized version, much of the data are obtained directly from boards of accountancy when they submit information about eligible candidates to NASBA's Gateway System. This System is a Web Interface which provides state boards a means to enter, review and manage candidate information. The process of entering candidate information using the Web Interface results in the eventual scheduling of an examination by the candidate.

Candidate information is transmitted through the Gateway System and stored in the National Candidate Database where all CPA candidate information and examination history are maintained. To supplement those data, candidates are asked to voluntarily complete a questionnaire, either online or in hard copy format, at the time their eligibility is submitted to the Gateway. During the first year of the computerized version, a smaller percentage of candidates provided the information than those who took the paper format. Missing questionnaires will be reflected in differences in some of the percentages reported. Most of the self-reported questionnaire data are quite sparse and

require caution in drawing any conclusions. As an example, percentages based on incomplete records caused by candidates who fail to provide information about the school or schools in which they took their accounting courses will not likely agree with other percentages of overall passing rates. This problem was present in previous years as well and is essentially unavoidable in a voluntary system such as the one used by NASBA. For the future, NASBA will consider ways to encourage candidates to provide the information, particularly because of the importance of the data to readers.

The rules for candidates to pass and receive credit for passing have also changed with the change in format. Candidates taking the paper-and-pencil format had to take and pass at least two sections of the Examination before earning credit for passing those sections. Subsequently, most of these candidates were required to take all not-yet-passed sections during the May and November examination periods. The computerized form of the Examination permits candidates to take one section at a time. The results for candidates taking the computerized form of the Examination, therefore, look somewhat different than those for candidates taking the paper-and-pencil form of the Examination.

The reports presented in this edition are generally in the same format as for previous editions. Wherever possible, the authors have tried to keep the information consistent with previous editions of this book. The differences are due to the change in testing format from a twice yearly Examination to the nearly continuous format maintained for the computerized Examination. As in the past, performance is defined in terms of a passing score of 75 on each section of the Examination. All four sections of the Examination must be passed in order for a candidate to be reported as successfully completing the Examination.

Since the sections on the computer-based form of the Examination do not fully measure the same content as on the paper-and-pencil form of the Examination, all candidates in 2004 are treated as First-Time candidates. This is the case even though a candidate may have credit earned by passing two or three sections of the paper and pencil form. Another important difference between the data in this book and in previous books involves the definitions of First-Time and Repeat candidates. For purposes of this book, the Repeat or First-Time status of a candidate is evaluated on a section-by-section basis. Candidates are considered to be First-Time candidates the first time they complete each section. Candidates who take a particular section more than once are defined as Repeat candidates for that particular section the second time and each subsequent time they take that section. Therefore, for example, one would be considered a Repeat candidate for FAR, if one had taken and failed FAR and then were taking it again. The same candidate, however, would be considered a First-Time candidate on AUD, if she or he took AUD for the first time after having already failed FAR. Finally, some tables and appendices provide breakdowns for First-Time or Repeat candidates, not differentiated by section (see, for example, Table 1). For these analyses, First-Time candidates refers to all candidates during the first time they attempted each section. In this context, Repeat candidates consist of all candidates who repeated at least one section, and scores for Repeat candidates (undifferentiated by section) include their most recent scores on all sections attempted. In 2004, there were 5,417 candidates who repeated at least one section.

Trends in Examination Participation

The change in test administration format from twice a year to the current two-month windows in each quarter has resulted in some changes in candidate numbers. The total numbers of First-Time and Repeat candidates for this first year appear to be down substantially compared to previous years. This is in part the case because there was no testing offered during the first quarter of 2004, as the computerized form of the Examination was offered only the last three quarters of 2004. More significant, however, is the delay in having candidates register. Several surveys seemed to reveal that a number of factors contributed to the decline including heavy workloads and the general rules for taking the Examination which changed and caused many candidates to delay deciding when to take the Examination. It is anticipated that this trend will start to reverse.

The reported candidate participation for the entire 2004 testing year is given in Table 1. It should be noted that under computer-based testing (CBT), it is now possible to identify unique candidates. Therefore, the numbers in Table 1 reflect the total number of candidates and the number of those candidates who also repeated one or more sections of the Examination. As can be seen in Table 1, there were 101,602 sections of the Examination taken during 2004. These sections were taken by 44,513 candidates. There were 94,605 sections taken by candidates who were First-Time candidates in 2004. In addition, 6,997 sections were taken by candidates who were considered Repeat candidates in 2004. The total of 44,513 includes the First-Time candidates, 5,417 of whom also repeated a total of 6,997 sections in 2004.

Table 1. Total CPA Examination Candidates

	2004	2004 Total Number of Sections Taken
First-Time Candidates	44,513	94,605
Repeat Candidates	5,417	6,997
Total	44,513	101,602

Because of the aforementioned changes in test format and administration, Table 1 does not include comparative data from the 2002 and 2003 administrations, since the information is not directly comparable. It is possible, however, to make some comparisons with previous years. In 2002 and 2003, there were 108,955 and 109,872 candidates, respectively, taking the paper-and-pencil form of the Examination. There were a substantial number of Repeat candidates in both 2002 and 2003. In 2002, for example, 74,088 individuals were Repeat candidates. Likewise, in 2003, 72,816 examinees were Repeat candidates. These numbers do not compare directly with the information in Table 1, however, because, as noted above, the definitions of First-Time and Repeat candidates are not the same. One reason for the discrepancy is that candidates who took the paper-and-pencil form in both May and November of 2002 and 2003 were counted each time. Under the computerized format, individual candidates are counted only once during the year. Even so, it does appear that there is a clear decline in the overall number of candidates taking the Examination from 2002 to 2004. As suggested earlier, it is quite possible that some of the decline may be

associated with the change in test administration format from the previous paper-and-pencil format to the current computerized format.

National Passing Percentages

National passing percentages are given in Table 2 along with percentages from 1994-2001, 2002, and 2003. The per-section percentages show the passing rates among those attempting the section. The percentage of First-Time candidates passing FAR in 2004, for example, was 42.0 percent of those attempting this section. The pattern of test taking in 2004 seems to reflect the change in rules for candidates to receive credit. Whereas all candidates would take all sections under the paper-and-pencil format, just over 20% of the candidates (only 9,485) took all sections of the CBT Examination. The impact of the CBT testing format may be seen by considering the passing percentages of First-Time candidates completing all sections. The percentage of these candidates who passed 0, 1, 2, 3, and 4 sections were 29.5, 16.5, 14.1, 14.9, and 25.0, respectively, substantially different than the percentages shown in Table 2a for all candidates. Compared to previous years, it is clear that a much higher percentage of CBT candidates (who took all sections) received some credit, and slightly more passed all sections. Recall that in previous years, candidates taking the paper-and-pencil version had to take and pass at least two sections to be able to receive any credit.

According to the information in Table 2a, passing rates for First-Time and Repeat candidates increased in 2004. Also, as can be seen in Tables 2a and 2b, it typically has been the case that First-Time candidates (see Table 2a) pass at a higher rate than Repeat candidates (see Table 2b). The passing rates in 2002 and 2003 for a single section are good examples as they are typically the same or slightly higher for First-Time candidates than for Repeat candidates. For example, the passing rate on FAR in 2003 for First-Time candidates was 32.5, and for Repeat candidates it was 27.4. There are exceptions, to be sure, as can be seen in the passing rate of 33.1 percent for First-Time candidates taking AUD in 2002 compared to the passing rate of 33.7 for 2002 Repeat Candidates. The salient point is that the passing rates for First-Time candidates usually have been higher than for Repeat candidates. This changed in 2004. In 2004, the passing rates for First-Time candidates were generally **lower** than for Repeat candidates on each section of the Examination. As an example, the passing rate for First-Time candidates in 2004 (see Table 2a) taking FAR was 42.0 and for Repeat candidates, it was 46.5. It is also the case that the passing rate on the number of sections passed is higher for Repeat candidates (see Table 2b) than for First-Time candidates (shown in Table 2a). In fact, passing rates for each of the sections as well as for the number of sections passed (see Table 2c) are higher for 2004 than for either 2002 or 2003.

This difference in passing rates between First-Time and Repeat candidates is interesting as it occurs at the same time that requirements changed for candidates to receive credit for passing individual sections of the Examination. Recall that in previous years, candidates taking the paper-and-pencil Examination had to pass at least two sections to receive credit and to be allowed to take the remaining sections. Under the current CBT Examination, it is possible to receive credit if only a single section of the Examination is passed. Candidates taking the CBT Examination, in other words, are able to concentrate their efforts for a single sitting of the Examination on just a single section rather than on two or more sections. This seems to be the strategy taken by the 5,417 candidates (12.2%) who elected to retake at least one section of the Examination in 2004. The

CBT Repeat candidates were more successful at subsequently passing a section they had previously failed than were Repeat candidates in previous years.

Table 2. National Passing Percentages by Section

Table 2a. National Passing Percentage for First-Time Candidates by Section

Sections	1994-2001	2002	2003	2004
FAR (Previously FARE)	29.5	31.4	32.5	42.0
AUD	30.0	33.1	32.9	42.5
REG (Previously ARE)	28.6	32.1	33.8	40.4
BEC (Previously LPR)				44.5
Number Sections Passed				
0	54.8	51.4	49.8	48.2
1				29.5

Number Sections Passed				
0	48.0	47.5	47.5	45.1
1				30.7
2	28.4*	28.9*	28.9*	13.0
3				5.0
4 (Total Examination)	23.6	23.6	24.6	6.3

* For paper-and-pencil testing, this is the percentage passing some subject(s), not all subjects.

Performance by Jurisdiction

In the past, NASBA has recognized as “Honor Roll States” those jurisdictions whose candidates have achieved passing scores in every subject at a rate higher than the national average. The Honor Role States for 2003 and 2004 are presented in Table 3. Many of the same jurisdictions that appear for 2003 also appear for 2004.

Table 3. Jurisdictions that had Passing Percentages for First-Time Candidates for all Four Subjects Higher than the National Average

May, 2003		November, 2003		2004	
Arizona	Montana	Alaska	New Hampshire	Arizona	North Carolina
California	Nevada	California	Texas	California	Oregon
Colorado	North Carolina	Colorado	Utah	Colorado	Texas
Florida	Oregon	Florida	Vermont	Georgia	Utah
Georgia	Utah	Illinois	Washington	Illinois	Washington
Illinois	Vermont	Iowa	Wisconsin	Indiana	Wisconsin
Iowa	Washington	Kansas		Iowa	
Maine	Wisconsin	Michigan		Kansas	
Minnesota		Minnesota		Minnesota	
Missouri		Missouri		Missouri	

Table 4 presents the 10 highest ranking jurisdictions ranked by passing percentage of First-Time candidates who attempted all four sections. The percentages in Table 4 are calculated within jurisdiction. These percentages for 2004 are noticeably higher than for both administration dates in 2003.

Table 4. Success Ranking by Jurisdiction:
First-Time Candidates Passing All Sections

May, 2003			November, 2003			2004		
Rank	Jurisdiction	Percent	Rank	Jurisdiction	Percent	Rank	Jurisdiction	Percent*
1	Montana	29.1	1	Wisconsin	22.2	1	Utah	42.9
2	Iowa	28.4	2	Colorado	21.1	2	Iowa	38.9
3	Wisconsin	27.6	3	New Hampshire	19.6	3	Georgia	38.6
4	Utah	23.2	4	Utah	19.4	4	Missouri	37.0
5	Colorado	23.0	5	Minnesota	19.3	5	Illinois	35.3
6	Vermont	22.7	6	Florida	19.2	6	North Carolina	34.9
7	Missouri	20.0	7	Washington	18.0	7	Kansas	34.5
8	Georgia	19.6	8	Vermont	17.4	8	Oregon	32.5
9	North Carolina	18.8	9	Iowa	17.2	10	Texas	32.0
10	Illinois	18.7	10	Illinois	16.9	10	Wisconsin	32.0

*Note: For 2004, percentages are computed using only examinees attempting all four sections

Table 5 presents the 10 highest ranking jurisdictions ranked by passing percentage of First-Time candidates on each of the four sections of the Examination. In Table 6, we present the 10 jurisdictions with the highest passing percentages of First-Time candidates on each of the following: all four sections (Table 6a), passing at least 1, 2, or 3 sections (Table 6b), and passing exactly 1, 2, or 3 sections (Table 6c). For Table 5, percentages are based on all candidates attempting the particular section. For Table 6, percentages are based on all candidates within the jurisdiction, regardless of which (or how many) sections were attempted.

Table 5. Pass Rates for First-Time Candidates Passing Each Section by Jurisdiction

6	Kentucky	34.9	6	Colorado	14.9	6	New Hampshire	8.0
7	Minnesota	33.5	7	New Hampshire	14.7	6	Illinois	8.0
8	Connecticut	33.1	8	Oregon	14.3	8	Minnesota	7.8
9	Pennsylvania	33.0	9	North Carolina	14.2	9	Indiana	7.4
10	Florida	32.9	10	Missouri	14.1	10	Oregon	7.3

Table 7 presents the same data as in Table 5, only with respect to Repeat candidates. That is, the data in Table 7 identify the 10 highest ranking jurisdictions with respect to the percentage of candidates passing each section, given that the candidates attempted that section more than once. This set of tables is of interest given the change in the requirements for candidates to begin to earn credit. Recall that under the paper-and-pencil format, candidates had to pass at least two sections to initially earn credit, but under the CBT format, candidates can earn credit for passing one

Table 7. Pass Rates for Repeat Candidates Passing Each Section by Jurisdiction

Table 7a. Pass Rates for Repeat Candidates Passing FAR by Jurisdiction

Rank	Jurisdiction	Percent
1	Kansas	80.0
2	Minnesota	72.7
3	Puerto Rico	70.6
4	Tennessee	70.0
6	Utah	66.7
6	Florida	66.7
9	Idaho	60.0
9	Mississippi	60.0
9	Wyoming	60.0
10	Alabama	59.5

Table 7b. Pass Rates for Repeat Candidates Passing AUD by Jurisdiction

Rank	Jurisdiction	Percent
1	South Dakota	100.0
3	Minnesota	75.0
3	Rhode Island	75.0
4	North Carolina	70.4
5	Montana	63.6
7	Nevada	60.0
7	Oklahoma	60.0
7	Utah	60.0
9	Arizona	58.8
10	New Hampshire	56.7

Table 7c. Pass Rates for Repeat Candidates Passing REG by Jurisdiction

Rank	Jurisdiction	Percent
1	Mississippi	100.0
1	Rhode Island	100.0
1	Utah	100.0
4	Arizona	81.3
6	Alaska	75.0
6	Idaho	75.0
6	Oregon	75.0
8	Kentucky	66.7
10	Missouri	62.5
10	Nevada	62.5

Table 7d. Pass Rates for Repeat Candidates Passing BEC by Jurisdiction

Rank	Jurisdiction	Percent
1	Arkansas	83.3
1	Iowa	75.0
3	Kentucky	70.0
4	Indiana	68.4
5	Colorado	67.4
6	Kansas	66.7
7	Georgia	63.9
8	Illinois	62.8
9	Oregon	62.5
10	Minnesota	61.5

section. Consequently, the percentages of Repeat candidates that pass each section are of some interest.

In addition, Table 8 shows the 10 highest ranking jurisdictions with respect to the percentages of all candidates who passed (a) all sections, (b) at least 1, 2, or 3 sections, and (c) exactly 1, 2, or 3 sections. Note that the data in Table 8 reflect all sections taken by candidates, including any sections that were repeated.

Table 8. Pass Rates for All Candidates by Jurisdiction

Table 8a. Pass Rates for All Candidates
Passing All Sections by Jurisdiction

Rank	Jurisdiction	Percent

10	Arkansas	34.5	10	Indiana	15.2	10	Oregon	7.0

More detailed information by jurisdiction on number of candidates testing, passing rates for individual sections, overall passing rates, and performance differences between First-Time and Repeat candidates is provided in Appendices A through H.

College and University Data

Graduates from more than 2,000 colleges and universities are represented among the candidates for the Examination. Examination performance for each school with five or more candidates is summarized. These data are presented in the following Appendices:

Appendix I: Performance of Candidates Without Advanced Degrees by School

Appendix J: Performance of Candidates With Advanced Degrees by School

Appendix K: Performance of Candidates by Accounting School

These data are not intended to represent the quality of the institution. Neither are they intended to indicate that a particular institution's primary mission is to prepare candidates for the Examination, or that schools should necessarily concentrate on improving their relative standings. Many of the factors that could possibly affect Examination performance are not examined in this report.

In addition, the numbers of candidates testing at each school under various conditions are given in the following Appendices:

Appendix L Number of Candidates Testing by School Granting Highest Degree

Appendix M: Number of Candidates Testing by Accounting School

Institutional Representation

Table 9 presents the number of sections passed by First-Time candidates for the 10 schools with the highest numbers of candidates testing. Table 9a presents the list for candidates without advanced degrees. These include candidates with no degree, candidates with an Associate degree and candidates with a Bachelors degree. Table 9b reports on candidates with advanced degrees.

The data in Table 9 differ from those presented in the past as data in previous years included all sections of the Examination. Candidates are now able to take one section at a time and, if they pass, can earn credit for that section. Consequently, the data in Table 9 reflect the number of sections passed by First-Time candidates from each school. CUNY Bernard M. Baruch and the University of Southern California were tops in terms of the number of candidates without and with an advanced degree, respectively.

Table 9. Number of First-Time Candidates by School

Table 9a. Number of First-Time Candidates Without Advanced Degrees by School

In Table 15, the schools with the 10 highest Repeat candidate passing rates are presented for each of the sections for candidates without an advanced degree who repeated the section. If a candidate is a Repeat tester (i.e., they took at least one section more than once) but passed the particular section of interest as a First-Time candidate, they do not appear here. Only those who took the section at least twice are included. For example, in Table 15a, it can be seen that St. Johns University of New York is the institution with the largest percentage of Repeat candidates passing FAR. Because the number of Repeat candidates per school is substantially smaller than the

number of First-Time candidates, schools had to have at least five candidates re-testing in the section to appear in these tables.

Table 15. Schools with Highest Passing Rates By Section Among Repeat Candidates Without Advanced Degrees

Previous editions of this book presented the numbers of Repeat candidates with and without advanced degrees passing each section of the Examination. Data for candidates with advanced degrees are not presented in the current book because there were very few schools that had at least five Repeat candidates with advanced degrees passing each section. There are numerous possible explanations for this, most notably the reduction in the number of candidates taking the Examination this year and the fact that, for purposes of this book, candidates who previously took and failed sections of the paper-and-pencil exam were considered First-Time candidates during their initial computerized administration.

Although small sample sizes preclude presenting data on Repeat candidates with advanced degrees by school, it is possible to show the effects on overall exam performance of retesting by candidates with advanced degrees. Table 17 presents the 10 highest ranking schools with respect to the percentages of all candidates with advanced degrees who passed (a) all sections, (b) at least 1, 2, or 3 sections, and (c) exactly 1, 2, or 3 sections. As was the case with Table 16, data in Table 17 reflect all sections taken by candidates, including any sections that were repeated.

Characteristics of Candidates

An important part of this document is to provide information about the characteristics of candidates as they relate to passing the Examination. A description of the degree status of candidates and their passing rates is presented below. It is important to point out that a substantial number of candidates did not provide background data by submitting questionnaires. Although candidates are not required to do so, it is not clear why some candidates did return theirs and others did not. It is important to note that interpretation of results given the low return rate needs to be made with caution. NASBA is considering ways to encourage candidates to provide the information in the future.

Degree Status and Passing Rates of Candidates

Accounting practice requires substantial post-secondary instruction. The majority of candidates receive this instruction as part of a degree program, either undergraduate or graduate. Not surprisingly, the passing rates of candidates are fairly clear with respect to degree status. As can be seen in Table 18, the largest number of candidates attempting the Examination is for those who have earned a Bachelor's degree. This is not an uncommon finding. Most individuals who enter

Table 18. Number and Percent Passing by Highest Degree Earned

the profession do so with an undergraduate degree. It is also evident that far fewer candidates without a degree pass at least one section.

The high totals for None in Table 18 (and also in Tables 19 and 20) are because the None category may include candidates (a) whose accounting courses or other business-related courses did not lead to a degree, (b) whose educational information was not available, or (c) who were allowed to take the Examination without having completed the degree. Likewise, the candidates included in the Unknown category in this and in Tables 19 and 20 were ones for whom a valid degree code was not provided.

The data in Table 18 suggest that education level is associated with success on the Examination. Candidates with higher levels of education appear to be passing one or more sections at a rate that is higher than candidates with lower educational levels. This is not surprising because many jurisdictions require 150 hours of study before admission to take the Examination. More detailed information on performance of candidates by level of education is provided in Appendix N.

Table 19 presents the numbers and passing percentages of First-Time and Repeat candidates by highest degree earned. (As in previous tables, results for cells in a table are presented only when a total of five or more candidates are in a category.) In the columns in the right of Table 19, the percentages of candidates passing (where passing is defined as passing all four sections) by type of degree are presented. As was shown in previous tables in this report, Repeat candidates have higher pass rates than First-Time candidates. This is likely due to the fact that so few candidates pass all sections on their first attempt. As expected, candidates with advanced degrees tend to have higher pass rates, among both First-Time and Repeat candidates.

Table 19. Passing Rates by First-Time and Repeat Candidates
By Educational Background

Degree	Number of Candidates		Percent Passing		
	First-Time Only	Repeat	First -Time Only	Repeat	Total
None	6,062	881	8.0	7.9	8.0
Associate	350	55	2.3	5.5	2.7
Bachelor's	26,062	3,560	5.2	7.4	5.4

Unknown	109	17	5.5	0.0	4.8

Total Semester Hours

The data in Table 20 suggest that the modal number of hours of academic credit was between 150 and 160. The next highest category was that for candidates with 161 or more hours of credit. These data are self-reported, however, and as can be seen in Table 20, a substantial number of candidates (41,143 of the 44,513 candidates who took the Examination) did not provide information about the credit hours they earned in college. As has been noted in previous editions of this report, it is also the case that candidates may incorrectly convert quarter hours to semester hours.

Table 20. Academic Hours of College Credit for First-Time
And Repeat Candidates

Number of Academic Hours	First-Time Candidates	%	Repeat Candidates	%
Less than 120	52	1.5%	8	1.4%
120 - 130	567	16.8%	94	16.9%
131 - 149	462	13.7%	76	13.7%
150 - 160	1,254	37.2%	206	37.1%
160+	1,035	30.7%	172	30.9%
Total	3,370	100.0%	556	100.0%

First-Time candidates with an advanced degree reported an average of 50.3 semester hours of accounting already earned or expected within 120 days. This is in contrast to results reported in previous editions of this report. In 2003, First-Time candidates with an advanced degree were reported as indicating an average of 36.4 semester hours of accounting. Likewise, Repeat candidates this last year reported an average of 54.6 semester hours of accounting for the same period. The probability of passing all four sections the first time was higher for candidates with more than 160 hours of academic credit. Additional information on candidate performance by semester hours in all courses and in accounting-related courses is provided in Appendices O and P, respectively.

Supplementary Examination Preparation

Information on candidates who took a CPA review course is self-reported and is sparse. About six percent of candidates who submitted the information report taking such a course. Over all candidates, 1.9 percent reported taking one course, about 1.5 percent reported taking two courses, 0.5 percent reported taking three courses and 3.2 percent reported taking four courses. The percent of candidates taking review courses is given in Appendix Q. The most commonly cited type of course is proprietary. The percent passing each section appears to be higher for candidates taking some kind of CPA review course prior to taking the Examination. This information is broken down further in Appendix R by Repeat status and by number of supplementary study courses. Although these numbers are somewhat interesting and suggest the value of the CPA review courses, they are also based on sparse information and so must be interpreted cautiously.

Decision to Major in Accounting

A question asking candidates when they decided to study accounting has been posed annually since 1994. Appendix S presents the performance of candidates in 2004 by the time in their academic careers at which they decided to study accounting. These data are also sparse, having been reported by only 3,731 of the 44,513 candidates. Interpreting these numbers should be done with caution as it is not clear why the remaining 40,782 did not report this information. Clearly, the majority of candidates who reported this information indicated they decided either before entering college or while they were lower division students. This is consistent with information from previous years.

Grade Point Average

Data on test performance as a function of grade point average (GPA) has not previously been studied. Appendix T presents the performance of candidates in 2004 by their undergraduate GPA, separately for First-Time and Repeat candidates. Appendix U presents the same data as a function of candidates' GPAs in accounting courses. Data for both Appendices are sparse. Appendix T is based on only 2,728 First-Time and 439 Repeat candidates. Appendix U is based on only 2,583 First-Time and 416 Repeat candidates. Again, because of the small sample sizes, these data should be interpreted cautiously.

Undergraduate Major

Data on test performance as a function of undergraduate major has also not previously been studied. These data are provided in Appendix V for nine different broad fields of study, plus an “Other” category. Data on test performance are provided for majors which were selected by at least five candidates. Consistent with other data received from the questionnaire, the sample size was small. Furthermore, of the 2,822 candidates responding, 2,457 selected the “Other” category, meaning that the nine fields did not adequately capture the areas in which candidates majored.

Summary

The performance data reviewed here were for candidates taking the computer-based Examination during 2004, the first year for which this examination format was offered. The most striking aspect of these data, as can be seen in Table 1, is that the number of candidates was substantially lower in 2004 than in the previous two years. The reasons for this are not clear from the data available for this edition. What is evident, however, is that much of the data for the passing rates appear to be higher than those in the past but the effects of educational level and candidate self-reported background appear to be consistent with data from previous years.

One unfortunate problem was that the background questionnaire information was available on only a very small subset of the 44,513 candidates who took the Examination in 2004. It would have been possible to more fully analyze the data that were available but lack of an explanation as to which candidates did or did not respond would make interpreting the results difficult. NASBA is exploring ways to improve the return of completed questionnaires.

* The FAR, AUD, REG, and BEC columns for first-time candidates report the percentages passing the respective sections on their first attempt. For repeat candidates, the columns represented the percentage passing the respective sections on a repeated attempt.

** The ALL, NONE, and SOME columns for repeated sections only are based on the percentage of candidates taking at least one section more than once that passed all, none, or some of the repeated sections.

*** The ALL, NONE, and SOME columns for all sections are based on the percentage of candidates taking at least one section more than once that passed all, none, or some of the four sections. Note that sections passed as a first-time candidate may contribute to these columns.

Note: Passing Rates for individual sections show the percentage of passing scores for all candidates attempting that section
Passing Rates for All, None, and Some are across all candidates

Averages omitted because cell contains fewer than 5 candidates.

											59.4

* The FAR, AUD, REG, and BEC columns for first-time candidates report the percentages passing the respective sections on their first attempt. For repeat candidates, the columns represent the percentage passing the respective sections on a repeated attempt.

** The ALL, NONE, and SOME columns for repeated sections only are based on the percentage of candidates taking at least one section more than once that passed all, none, or some of the repeated sections.

*** The ALL, NONE, and SOME columns for all sections are based on the percentage of candidates taking at least one section more than once that passed all, none, or some of the four sections. Note that sections passed as a first-time candidate may contribute to these columns. Note: Passing Rates for individual sections show the percentage of passing scores for all candidates attempting that section

Averages omitted because cell contains fewer than 5 candidates.

Appendix P. Performance of Candidates by Semester Hours of Accounting

Semester Hours	Percent of Total	Number of Candidates	Percent Passing			ALL	NONE	SOME
			FAR	AUD	REG			
Under 10	2.1	72	47.2	29.8	33.3	43.8	2.8	47.2
11 - 14	1.5	49	64.3	14.3	39.3	41.9	0.0	49.0
